Memorandum

To: Sussex County Planning Commission Members
From: Lauren Devore, Planner III
CC: Vince Robertson, Assistant County Attorney and applicant
Date: July 1st, 2021
RE: Staff Analysis for CU 2249 Mayapple Farm, LLC

This memo is to provide background and analysis for the Planning Commission to consider as a part of application C/U 2249 Mayapple Farm, LLC to be reviewed during the July 1 2021, Planning Commission Meeting. This analysis should be included in the record of this application and is subject to comments and information that may be presented during the public hearing.

The request is for a Conditional Use (C/U 2249) for 41 multifamily units (single-family detached condominiums) to be located on the west side of Williamsville Road (S.C.R. 395), approximately 0.76 mile southeast of Lighthouse Road (Route 54). The property consists of Tax Parcel 533-19.00-289.05, which contains 20.91 acres +/-.

The 2018 Sussex County Comprehensive Plan Update (Comprehensive Plan) provides a framework of how land is to be developed. As part of the Comprehensive Plan, a Future Land Use Map is included to help determine how land should be zoned to ensure responsible development. The Future Land Use map in the plan indicates that the subject property has a land use designation of "Coastal Area." The properties to the north, south, west and east of the subject property also have the land use designation of "Coastal Area."

As outlined in the 2018 Sussex County Comprehensive Plan, Coastal Areas are areas that can accommodate development provided special environmental concerns are addressed. A range of housing types should be permitted in Coastal Areas, including single-family homes, townhouses, and multi-family units. Retail and office uses are appropriate but larger shopping centers and office parks should be confined to selected locations with access along arterial roads. Appropriate mixed-use development should also be allowed. In doing so, careful mixtures of homes with light commercial, office and institutional uses can be appropriate to provide for convenient services and to allow people to work close to home. Major new industrial uses are not proposed in these areas.

The property is zoned Agricultural Residential (AR-1). The properties to the north and west (to include the Bay View Estates Subdivision) are all zoned Agricultural Residential (AR-1) as is the property to the northeast on the opposite side of Williamsville Road (S.C.R. 395). The adjacent community of Americana Bayside to the east of the subject property is zoned Medium Density Residential, Residential Planned Community (MR-RPC).

Since 2011, there have been six (6) Conditional Use applications within a 0.5-mile radius of the application site. The first application was for Conditional Use No. 1438 to allow for the expansion of boat storage and amendment to the Conditions of Approval as part of an existing Conditional Use application, C/U 1106. The application was approved by the Sussex County Council at their

meeting of Tuesday, March 15, 2018 and the use was adopted through Ordinance No. 2575. The second application was Conditional Use No. 1367 to allow for a sign shop. The application was approved by the Sussex County Council at their meeting of Tuesday, November 28, 2000 and the use was adopted through Ordinance No. 1417. The third application was Conditional Use No. 2197 to allow for 62 multifamily units (duplex units). The application was approved by the Sussex County Council at their meeting of Tuesday, December 17, 2019 and the use was adopted through Ordinance No. 2701. The fourth application was for Conditional Use No. 1152 to allow for a retail sales and consignment shop. The application was approved by the Sussex County Council at their meeting of Tuesday, April 30, 1996 and the use was adopted through Ordinance No. 1088. The fifth application was Conditional Use No. 1227 to allow for a corn maze recreation activity. The application was approved by the Sussex County Council at their meeting of Tuesday, April 7, 1998 and the use was adopted through Ordinance No. 1225.

It should be noted that the sixth application, also located near the project site, is currently pending hearings before the Planning and Zoning Commission and the Sussex County Council. This application is for Conditional Use No. 2292 to allow for 32 multifamily duplexes.

A map delineating the location of all Conditional Uses in this area has been provided to the Commission and has been included in the Paperless Packet that was circulated to the Commission.

Based on the analysis of the land use, surrounding zoning, and uses, a Conditional Use (C/U 2249) to allow for 41 multifamily units in this location could be considered as being consistent with the land use, area zoning, and surrounding uses.

Check List for Sussex County Planning & Zoning Applications

The following shall be submitted with the application

✓ **Completed Application**

✓ **Provide eight (8) copies of the Site Plan or Survey of the property**

- Survey shall show the location of existing or proposed building(s), building setbacks, parking area, proposed entrance location, etc.
- Provide a PDF of Plans (may be e-mailed to a staff member)
- Deed or Legal description

✓ **Provide Fee \$500.00**

Subject Books will be provided
or to Planning Commission
meeting.

— **Optional - Additional information for the Commission/Council to consider** (ex. architectural elevations, photos, exhibit books, etc.) If provided submit 8 copies and they shall be submitted a minimum of ten (10) days prior to the Planning Commission meeting.

✓ **Please be aware that Public Notice will be sent to property owners within 200 feet of the subject site and County staff will come out to the subject site, take photos and place a sign on the site stating the date and time of the Public Hearings for the application.**

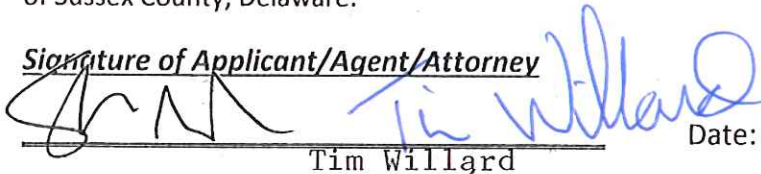

✓ **DeIDOT Service Level Evaluation Request Response**

✓ **PLUS Response Letter** (if required) will be provided prior to the Planning Commission Meeting.

The undersigned hereby certifies that the forms, exhibits, and statements contained in any papers or plans submitted as a part of this application are true and correct.

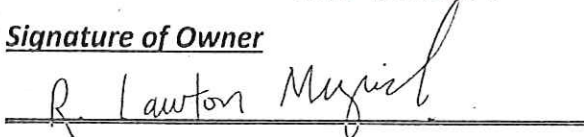

I also certify that I or an agent on my behalf shall attend all public hearing before the Planning and Zoning Commission and the Sussex County Council and any other hearing necessary for this application and that I will answer any questions to the best of my ability to respond to the present and future needs, the health, safety, morals, convenience, order, prosperity, and general welfare of the inhabitants of Sussex County, Delaware.

STATE OF DELAWARE
DEPARTMENT OF TRANSPORTATION
800 BAY ROAD
P.O. Box 778
DOVER, DELAWARE 19903

JENNIFER COHAN
SECRETARY

September 29, 2020

Mr. Jamie Whitehouse, Director
Sussex County Planning & Zoning
P.O. Box 417
Georgetown, DE 19947

Dear Mr. Whitehouse:

The Department has completed its review of a Service Level Evaluation Request for the **Mayapple Farm, LLC** conditional use application, which we received on August 31, 2020. This application is for an approximately 23.70-acre parcel (Tax Parcel: 533-19.00-289.05). The subject land is located on the southwest side of Williamsville Road (Sussex Road 395), approximately 4,000 feet south of the intersection of Lighthouse Road (Sussex Road 58) and Williamsville Road. The subject land is currently zoned AR-1 (Agricultural Residential), and the applicant is seeking a conditional use approval to develop 41 single-family detached condominium houses.

Per the 2019 Delaware Vehicle Volume Summary, the annual average and summer average daily traffic volumes along the segment of Williamsville Road where the subject land is located, which is from Lighthouse Road to the Delaware / Maryland state line, are 2,676 and 3,444 vehicles per day, respectively.

Based on our review, we estimate that the above land use will generate fewer than 50 vehicle trips in any hour and fewer than 500 vehicle trips per day. These numbers of trips are DelDOT's minimum warrants for determining that a Traffic Impact Study (TIS) should be required for a particular development. Because the proposed land use would not meet these warrants, we consider the development's traffic impact to be negligible in the context of our agreement with the County regarding land development coordination and we do not recommend that the applicant be required to perform a TIS for the subject application. DelDOT's description of this application as negligible with regard to warranting a TIS does not mean that it is negligible in other respects. We recommend that the applicant not be required to perform a TIS for the subject application.

If the County approves this application, the applicant should be reminded that DelDOT requires compliance with State regulations regarding plan approvals and entrance permits, whether or not a TIS is required.

Mr. Jamie Whitehouse

Policy for Extending District Boundaries

1. Property owner (developer) and/or his representative shall make a request to the Utility Planning Division for a Sewer System Concept Evaluation.
2. Property owner (developer) and/or his representative shall meet with the applicable planning and zoning agency to determine if zoning is appropriate for the development being planned.
3. With appropriate zoning, property owner (developer) and/or his representative shall send a letter (with appropriate application fee as listed below) requesting the Sussex County Council to consider extending the water and/or sanitary sewer district boundaries. (Sussex County Code)

Application Fees	
Less than 2 acres	\$500.00
2.1 -9.99 acres	\$750.00
10 - 150.00 acres	\$1,500.00
Greater than 150.00 acres	\$2,500.00

4. The Sussex County Engineering Department shall present, for Sussex County Council's consideration, posting of notices for the proposed extension of the district boundaries.
5. The Sussex County Council approves posting notices for the proposed extension of the boundaries. (If approval to post the notices is not given, the appropriate fee is refunded.)
6. Within ninety days of the posting of the notices, the Sussex County Council approves/disapproves extending the boundaries.
7. The Sussex County Council approves/disapproves of the extension of the water and/or sanitary sewer pipelines under the appropriate Sussex County Ordinance.

EXECUTIVE SUMMARY

Mayapple Farm Executive Summary

It is the intention of Mayapple Farm, LLC to develop the property along Williamsville Road (Tax Map Parcel 533-19.00-289.05), as a residential single-family development. The total project area is 20.91 acres with approximately 15 acres of uplands.

The parcel is currently zoned AR-1 and is in the Coastal Area Zone. The project will be developed as single-family homes in a detached condominium ownership regime. As such, a Conditional use is requested. Forty-one (41) single family homes are proposed. The Standard footprint of each home is 36' x 48'. Density, based on available upland area, is 2.73 units/acre. Overall density is 1.98 units/acre.

The project is surrounded by existing developed areas. There are single-family lots fronting Williamsville Road east of the site. Bayview Estates is adjacent to the property along the north and west boundaries. The Master Planned community, Americana Bayside is across Williamsville Road from the proposed Mayapple Development.

Amenities on site will include a kayak launch area, pool, and pool house for use by community residents only.

Stormwater management will meet the requirements of the Sussex Conservation District. A minimum 50' tidal buffer is provided from tidal waters and tidal wetlands. A 25' buffer from Non-Tidal Wetlands is proposed. A 30' planted buffer is provided adjacent to existing developed areas.

The project will be accessed from Williamsville Road. Central sewer will be provided by Sussex County. Central water will be provided by Artesian Water Company.

A Preliminary Site Plan and Site Plan Rendering are included for reference. An Environmental Assessment and Public Facility Report, Chapter 99 – Subdivision of Land Report, and PLUS response letter are included in the project binder.

Re: Mayapple Farm
Tax Map Parcel 533-19-289.05
Conditional Use
GMB Project 200123

Dear Ms. DeVore:

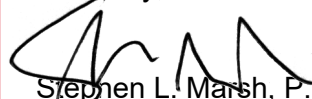

Enclosed please find a Conditional Use Application and supporting documentation for the Mayapple Farm project. Mayapple Farm, LLC intends to develop the property along Williamsville Road (Tax Map Parcel 533-19.00-289.05), as a residential single-family development in condominium ownership regime. The total project area is 20.91 acres with approximately 15 acres of uplands.

The parcel is currently zoned AR-1 and lies in the Coastal Overlay Zone. The project will be developed as a detached condominium. Forty-one (41) single family homes are proposed. The standard footprint of each home is 36' x 48'. Overall density is 1.96 units/acre. The project is surrounded by existing developed areas along Williamsville Road, consisting of single-family residential development. The Residential Planned community, Americana Bayside is across Williamsville Road from the property. Amenities on site will include a kayak launch area, pool and pool house for use by community residents only.

We have included an exhibit that reflects a minimum 60' wide / 7500 sf fee simple lot layout for comparison. Please note the increase in disturbed area in the traditional layout. Our intent is to provide an alternative that achieves the intent of a cluster development option, reduces the development footprint and clearing of the existing forested area and maximizes open space.

We will submit the appropriate number of copies for the Planning Commission Public Hearing upon your review and approval. If you should have any questions, or comments, please feel free to contact me by telephone at (410) 742-3115 or by e-mail at smarsh@gmbnet.com.

Sincerely,

Stephen L. Marsh, P.E.
Sr. Vice President

Check List for Sussex County Planning & Zoning Applications

The following shall be submitted with the application

Completed Application

Provide eight (8) copies of the Site Plan or Survey of the property

- Survey shall show the location of existing or proposed building(s), building setbacks, parking area, proposed entrance location, etc.
- Provide a PDF of Plans (may be e-mailed to a staff member)
- Deed or Legal description

Provide Fee \$500.00

Optional - Additional information for the Commission/Council to consider (ex. architectural elevations, photos, exhibit books, etc.) If provided submit 8 copies and they shall be submitted a minimum of ten (10) days prior to the Planning Commission meeting.

Please be aware that Public Notice will be sent to property owners within 200 feet of the subject site and County staff will come out to the subject site, take photos and place a sign on the site stating the date and time of the Public Hearings for the application.

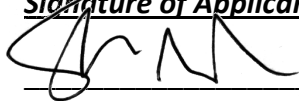

DeIDOT Service Level Evaluation Request Response

PLUS Response Letter (if required) [will be provided prior to the Planning Commission Meeting.](#)

The undersigned hereby certifies that the forms, exhibits, and statements contained in any papers or plans submitted as a part of this application are true and correct.

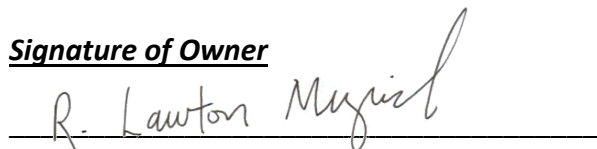

I also certify that I or an agent on my behalf shall attend all public hearing before the Planning and Zoning Commission and the Sussex County Council and any other hearing necessary for this application and that I will answer any questions to the best of my ability to respond to the present and future needs, the health, safety, morals, convenience, order, prosperity, and general welfare of the inhabitants of Sussex County, Delaware.

Sussex County Planning & Zoning
P.O. Box 417
Georgetown, DE 19947

Attn: Mr. Jamie Whitehouse
Director

Re: Conditional Use Request
Tax Map Number 5-33-19.00 Parcel 289.05
C/U # 2249
Mayapple Farm

Dear Mr. Whitehouse:

On behalf of Mayapple Farm, LLC, please accept this Environmental Assessment and Public Facility Evaluation Report for "Mayapple Farm", identified as Tax Map Number 5-33-19.00 Parcel 289.05. This letter is in support of the Conditional Use Application and Preliminary Site Plan submittal as encouraged by Sussex Code 115-194.3. A copy of this letter report has also been included in the project binders.

The Conditional Use Application and supporting documentation was previously submitted to Sussex County Department of Planning and Zoning on November 05, 2020. Parcel 289.05 is 20.91 acres, currently zoned AR-1 and is in the Coastal Area Zone. It is the intention of Mayapple Farm, LLC to develop this site as a detached single-family community, in a condominium ownership regime. The development will consist of forty-one (41) single family homes.

Stormwater Management (SWM) and Erosion and Sediment Control (ESC)

The stormwater management design will meet all current regulatory requirements. A pre-application meeting was held at the Sussex Conservation District on December 9, 2020. A proposed stormwater management and erosion and sediment control plan is being prepared for review by the Sussex Conservation District. The developer will incorporate swales, bioswales, wet extended detention ponds and some constructed wetlands into the final drainage and landscape plans. We anticipate incorporating green technology into the final design as much as possible.

Public Water Supply

Public water service will be supplied by Artesian. Artesian has provided an "Ability to Serve" letter for the project. The development team has been coordinating with Artesian on connection points and design criteria.

Public Wastewater Collection, Treatment and Disposal

The project is located within the Fenwick Island Sanitary Sewer District. A 2-inch force main connection point will be extended to the parcel's frontage along Williamsville Road. The proposed project is within planning study assumptions for sewer service and there will be adequate capacity for the project as proposed. A Sewer Concept Evaluation Request was reviewed by the Sussex County Engineering Department on August 26, 2020.

Traffic

A DelDOT Pre-Application meeting was held on December 10, 2020.

Threatened/Endangered Species

There are no known Threatened or Endangered species on the site.

Tidal/Non-tidal Wetlands

Environmental Resources, Inc. (ERI) performed a delineation of Waters of the United States including wetlands subject to the Corps of Engineers' Regulation Program. The investigation was in accordance with the three-parameter approach evaluating soils, hydrology, and vegetation outlined in the 1987 Corps of Engineers Wetlands Delineation Manual and associated guidance. In accordance with Delaware Department of Natural Resources and Environmental Control (DNREC) wetlands maps, there are no State regulated wetlands occurs on or in the vicinity of the subject property.

In regard to federally regulated or waters subject to the Corps of Engineer's Regulatory Program, approximately 5.61 acres of the 20.91-acre property is regulated area. Man-made drainage ditches (0.38 acres) classified as Waters of the US are found along and bordering the east boundary of the site. There are non-tidal wooded wetlands (4.99 acres) in the Southwest quadrant of the property. There is a portion of a tidal canal (0.24 acres) along the southern boundary of the site. This canal is classified as Waters of the US and State Regulated Subaqueous Lands. The presence of these drainage features should not be impacted by anticipated development. A permit will be required to install the kayak launch along the tidal canal.

Other interior man-made drainage ditches are not regulated by the Army Corps of Engineers. These drainage features only exhibit ephemeral flow or infrequent, intermittent flow. They are not perennial streams. No buffers are required from these features.

ERI has received an approved jurisdictional determination from the Philadelphia District Corps of Engineers regarding the 5.06 acres of regulated waters identified on the property. We are proposing a 25' Buffer from Non-Tidal Wetlands and a 50' Buffer from Tidal Wetlands.

Provision of Open Space

Approximately 63% of the existing site's 20.91 acres are slated for development. All areas not included in the individual condo lots or shared street section will be included in open space. The community open space will include active and passive recreation opportunities, consistent with other open space uses throughout the County.

A multimodal path along the project frontage at Williamsville Road will be provided.

Many active recreation opportunities are available via a proposed kayak and stand-up paddle board launch along the southern boundary of the site. An existing tidal lagoon offers access to Grey's Creek and Assawoman Bay beyond. A swimming pool and bath house are proposed for use of the residents and their guests.

The stormwater management facilities will be integrated into the natural environment with native plantings and will be used to further enhance the open areas of the development.

Provisions for Public and Private Infrastructure

Public infrastructure will include public water, public sewer, and public "dry" utilities (telephone, electric, cable television, data lines, etc.). The streets will be private infrastructure. The Condo Owner's Association (COA) will be responsible for the operation and maintenance of the streets, curbs, sidewalks, and any landscaping in the street right-of-ways as well as the proposed sewer system. A "blanket" easement over the proposed roads will allow utility access. The open space infrastructure will also be maintained and operated by the COA. The stormwater management facilities will also be subject to an operations and maintenance agreement between the COA and the Sussex Conservation District. The operation and maintenance agreements, along with pertinent deed covenants and restrictions, will be provided as these arrangements are made final.

Economic and Recreational Benefits

The economic benefits of in-fill development are well documented. A relatively small investment is needed in public infrastructure to accommodate this project. The additional real estate taxes generated by the forty-one (41) units will far exceed the current real estate tax revenue generated by approximately 20.91 acres of raw land. In addition, these homes will generate significant permit, inspection, and building permit fees.

In addition, the forty-one (41) proposed residential units will provide significant construction jobs during both the infrastructure (roads, sidewalks, trails, water, sewer, dry utilities) and vertical construction phases, as well as professional service jobs for engineers, surveyors, architects, and interior decorators. Once the residential units are complete, landscaping maintenance jobs will be created for the COA to maintain lawns, open space, landscape areas, and stormwater management facilities. The initial sale of the units will create jobs for local realtors, attorneys, and surveyors, as will subsequent re-sales in the years to follow. Most of the above-mentioned jobs, or increased workload opportunities, will be performed by local companies or individuals.

The addition of forty-one (41) units in this infill development will maintain or increase the workload for the current population employed within the local community.

Historic or Cultural Resources

There are no known historic or cultural resources, such as a National Register-listed property or an Archeological Site, on this parcel.

If a Department of the Army permit is required by the Corps of Engineers for this project or should a similar federal action be proposed, the applicant will coordinate as required under Section 106 with the State Historic Preservation Office. However, no federal actions are anticipated as part of this project.

If during the construction of the project any artifacts or other evidence of historic or cultural resources are discovered, the Delaware State Historic Preservation Office will be notified immediately.

Conformance with Current Sussex County Comprehensive Plan

The project is located within the State Levels 3 and 4 Investment Area and falls within the Coastal Area Zone per the Sussex County Comprehensive Plan. This infill project is in the correct location for the intended use, as documented in the PLUS comments and responses, and follow up correspondence with review agencies. All conditions and requirements within applicable sections of County Code Chapters 99, 110 and 115 will be met. As an infill residential development served with appropriate public infrastructure, the proposed Conditional Use is in conformance with the County Comprehensive Plan.

Conclusion

The proposed Conditional Use is consistent with the County's Comprehensive Land Use Plan. Based on the amount of existing infrastructure and development in the immediate vicinity, we disagree with the State Strategies Spending Level designation. The site's proximity to the neighboring developments, as well as the existing utility and roadway infrastructure, make this an ideal location for infill residential development.

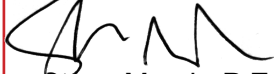

Environmental impacts will be minimized using best management practices for stormwater treatment, conservation of existing wetland and establishment of wooded buffer areas, provision of tidal buffers, and the provision of central water and sewer. The proposed development contains forty-one (41) units.

The economic benefits of the construction jobs, the permit fees, increased tax revenue, and long-term jobs associated with this community addition are well documented. The chances for a successful project, ensuring these jobs and economic benefits, are increased due to the success of the neighboring communities and existing infrastructure.

Mayapple Farm, LLC looks forward to working with Sussex County to implement the proposed development.

Please feel free to contact me with any questions.

Sincerely,

Steve Marsh, P.E.
Senior Vice President

MAYAPPLE FARM

Artist's Rendering, subject to change

Mayapple Farm
Chapter 99 – Subdivision of Land
Report

With regard to Section 99-9.C of the Sussex County Code, we offer the following comments:

1) Integration of the proposed subdivision into existing terrain and surrounding landscape.

The proposed development will feature forty-one (41) raised beach style homes, built on pilings, similar to other homes in the Fenwick Island corridor. The residential development is concentrated in the existing open space, which sits on a relatively flat open field, consisting of uplands bordered by wooded non-tidal wetlands and a small tidal ditch that empties into a tidal canal. The site is bisected by a small agricultural ditch that is not under U.S. Army Corps jurisdiction. The natural slope of the site will be maintained to the most feasible extent, while providing for positive drainage and stormwater management requirements.

2) Minimal use of wetlands and floodplains.

All homes will be designed to provide a finish floor elevation, well above the 100-year floodplain. There is a mandatory 50' buffer from tidal wetlands and tidal waterbodies. No wetlands are to be disturbed, other than crossings for water dependent activities, specifically the kayak launch along the tidal canal. Water dependent activities can take place within this buffer, but all home building construction will be outside of this buffer zone.

3) Preservation of natural and historical features.

The existing wooded nontidal wetlands are to be preserved in their natural state. As stated above, the proposed development is focused in the uplands area, towards the front of the site along Williamsville Road. A twenty-five-foot (25') buffer is proposed from non-tidal wetlands.

4) Preservation of open space and scenic views.

Approximately 35% of the 20.91 acres will remain as open space. A green corridor is provided around the perimeter of the project, through the preservation of non-tidal wooded wetlands and planted buffer. The view across the site will be enhanced by the vegetated buffer, utilizing native tree species.

5) Minimization of tree, vegetation and soil removal and grade changes.

Most of the existing tree cover will be preserved. Homes will be constructed on pilings, thus alleviating the need to import large amounts of structural fill. The elevation of the site will be increased as needed to minimize flooding risk and to provide for positive drainage. Excavation on site for SWM ponds should provide the bulk of the needed fill material.

6) **Screening of objectionable features from neighboring properties and roadways.**

A 30' wide planted buffer is proposed to augment the existing wooded backdrop that forms the rear perimeter of the site. This buffer will consist of larger maturing deciduous and evergreen trees, native to the State of Delaware.

7) **Provision for water supply.**

Water supply is being provided by Artesian Water Company. Capacity is available, the water main is being extended from existing Williamsville Road infrastructure that terminates south of the entrance to the Shoals at Sunridge, which is part of Americana Bayside.

8) **Provision for sewage disposal.**

Sewer will be provided by Sussex County as part of the West Fenwick Sanitary Sewer District. Capacity is available, and a conceptual sewer layout was approved by Engineering staff.

9) **Prevention of pollution of surface and groundwater.**

Stormwater management and erosion & sediment control will meet the requirements of the Sussex Conservation District (SCD) and by default, the goals of the Inland Bay Pollution Control Strategies. This project is located within the Maryland Coastal Bays watershed.

10) **Minimization of erosion and sedimentation, minimization of changes in groundwater levels, minimization of increased rates of runoff, minimization of potential for flooding and design of drainage so that groundwater recharge is maximized.**

Stormwater management will meet SCD requirements. Ponds will be unlined to allow for infiltration, so impact on groundwater elevation should be minimal.

11) **Provision for safe vehicular and pedestrian movement within the site and to adjacent ways.**

The development team worked with DelDOT representatives and are working through the design parameters of the entrance based on the existing constraints of the Williamsville Road corridor.

12) **Effect on area property values.**

This project is in a developed area with a mix of home types, predominately primary homes, and secondary beach homes. We believe the project will have a positive impact on area properties based on the proposed product type, the community layout, and proposed amenities.

13) **Preservation and conservation of farmland.**

There is no preservation of farmland, however this area is zoned AR, within the Coastal Zone and the proposed development is consistent with the Comprehensive Plan. This project is not located in an area that was designated for agricultural preservation.

14) Effect on schools, public buildings, and community facilities.

Because this project should be considered an infill development, there are no negative effects to area schools, public buildings, or community facilities.

15) Effect on area roadways and public transportation.

Per Comment #11 above, the development team is working with DeIDOT for an appropriate entrance to the Mayapple Farm community, which will be located along Williamsville Road. We anticipate minimal overall impacts, due to the small size of the proposed development.

16) Compatibility with other area land uses.

The project site is zoned AR, and the proposed development is consistent with the Comprehensive Plan. We would categorize this area as developed with mainly primary residences and second homes. The proposed development will be consistent with that characterization.

17) Effect on area waterways.

We anticipate no negative effect to area waterways. We will be required to treat stormwater on site before discharging to tidally influenced waterways. The accessibility of public sewer will avoid any environmental degradation from failing septic systems.

**PRELIMINARY LAND USE SERVICE
(PLUS)**

Preliminary Land Use Service (PLUS)

Delaware State Planning Coordination

122 Martin Luther King Jr. Blvd., South • Dover, DE 19901 • Phone: 302-739-3090 • Fax: 302-739-5661

Purpose of PLUS - The PLUS process is intended to provide consolidated State comments regarding the proposed project. The Applicant is encouraged to submit the application during the concept stages of planning as this process often offers recommendations for changes to the plan. The application should be submitted after the pre-application meeting with the local jurisdiction but before formal application is made.

Please complete this PLUS application in its entirety. **All questions must be answered. If a question is unknown at this time or not applicable, please explain.** Unanswered questions on this form could lead to delays in scheduling your review. This form will enable the state staff to review the project before the scheduled meeting and to have beneficial information available for the applicant and/or developer at the time of review. If you need assistance or clarification, please call the State Planning Office at (302) 739-3090.

PLUS Number (to be completed by OSPC): _____

Investment Level Per Strategies for State Policies and Spending (to be determined by OSPC): _____

1. Project Title/Name: **Mayapple Farm**2. Location (please be specific): **20.67 acres NW side of Williamsville Road, Williamsville, DE**3. Parcel Identification #: **533-19.00-289.05**4. Information Regarding Site:

10. Type of Review: <input type="checkbox"/> Rezoning, if not in compliance with certified comprehensive plan <input checked="" type="checkbox"/> Site Plan Review <input type="checkbox"/> Subdivision	
11. Brief Explanation of Project being reviewed: 41 Single Family homes in a Detached condominium regime on 20.67 acres. If this property has been the subject of a previous LUPA or PLUS review, please provide the name(s) and date(s) of those applications.	
12. Area of Project (Acres +/-): 20.67	Number of Residential Units: 41 Commercial square footage: 0 SF
13. Present Zoning: AR-1	14. Proposed Zoning: AR-1 w/ Conditional Use
15. Present Use: Agri. Use, Vacant Land	16. Proposed Use: Residential
17. Water: <input checked="" type="checkbox"/> Central (Community system) <input type="checkbox"/> Individual On-Site <input type="checkbox"/> Public (Utility) Service Provider Name: Artesian Will a new public well be located on the site? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
18. Wastewater: <input type="checkbox"/> Central (Community system) <input type="checkbox"/> Individual On-Site <input checked="" type="checkbox"/> Public (Utility) Service Provider Name: Sussex County Public Works Will a new community wastewater system be located on this site? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
19. If residential, describe style and market segment you plan to target (Example- Age restricted): Move up and Second home buyers	
20. Environmental impacts: Filling of Ag ditches, crossing Ag ditches, selective removal of trees How many forested acres are presently on-site? 10.82 How many forested acres will be removed? 1.58 To your knowledge, are there any wetlands, as defined by the U.S. Army Corps of Engineers or the Department of Natural Resources and Environmental Control, on the site? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No Are the wetlands: <input checked="" type="checkbox"/> Tidal Acres: 0.05 <input checked="" type="checkbox"/> Non-tidal Acres: 5.06 If "Yes", have the wetlands been delineated? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No Has the Army Corps of Engineers signed off on the delineation? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No Will the wetlands be directly impacted and/or do you anticipate the need for wetland permits? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If "Yes", describe the impacts: How close do you anticipate ground disturbance to wetlands, streams, wells, or waterbodies? <u>25' buffer from wetlands.</u>	
21. Does this activity encroach on or impact any tax ditch, public ditch, or private ditch (ditch that directs water off-site)? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
22. List the proposed method(s) of stormwater management for the site: Wet ponds and vegetate swales.	
23. Is open space proposed? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If "Yes," how much? Acres: 10.09 What is the intended use of the open space (for example, active recreation, passive recreation, stormwater management, wildlife habitat, historical or archeological protection)? Passive recreation, stormwater managment, wildlife habitat, active recreation	
24. Are you considering dedicating any land for community use (e.g., police, fire, school)? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

25. Please estimate How many vehicle trips will this project generate on an average weekday? A trip is a vehicle entering or exiting. If traffic is seasonal, assume peak season: **489**

What percentage of those trips will be trucks, excluding vans and pick-up trucks? **Less than 5%.**

26. Will the project connect to state maintained roads? ☒ Yes ☐ No **Williamsville Road, CR 359**

27. Please list any locations where this project physically could be connected to existing or future development on adjacent lands and indicate your willingness to discuss making these connections. **Sidewalk provided at Community entrance.**

28. Are there existing sidewalks? ☐ Yes ☒ No; bike paths ☐ Yes ☒ No
Are there proposed sidewalks? ☒ Yes ☐ No; bike paths ☐ Yes ☒ No

Is there an opportunity to connect to a larger bike, pedestrian, or transit network? ☒ Yes ☐ No

29. To your knowledge, is this site in the vicinity of any known historic/cultural resources or sites? ☐ Yes ☒ No

Has this site been evaluated for historic and/or cultural resources? ☐ Yes ☒ No

Would you be open to a site evaluation by the State Historic Preservation Office? ☐ Yes ☒ No

30. To promote an accurate review of your parcel's features, would you permit a State agency site visit? ☒ Yes ☐ No
Person to contact to arrange visit: **Lawton Myrick** phone number: **410-742-3115**

31. Are any federal permits, licensing, or funding anticipated? ☐ Yes ☒ No

I hereby certify that the information on this application is complete, true and correct, to the best of my knowledge.

Salisbury, MD 21801

RE: PLUS review 2020-08-09; Mayapple Farm

Dear Mr. Myrick:

Thank you for meeting with State agency planners on August 26, 2020 to discuss the proposed plans for the Mayapple Farm project. According to the information received you are seeking review of a proposed site plan for 41 residential units on 20.67 acres along Williamsville Road in Sussex County.

Please note that changes to the plan, other than those suggested in this letter, could result in additional comments from the State. **The developers will also need to comply with any Federal, State, and local regulations regarding this property. We also note that as Sussex County is the governing authority over this land, the developers will need to comply with any and all regulations/restrictions set forth by the County.**

Strategies for State Policies and Spending

This project is located in Investment Levels 3 and 4 according to the 2020 Strategies for State Policies and Spending. Investment Level 3 reflects areas where growth is anticipated by local, county, and state plans in the longer-term future, or areas that may have environmental or other constraints to development. State investments may support future growth in these areas but may have priorities for the near future. Level 3 areas may also mean that there are environmental concerns on or near the parcel and we would encourage you to design the site with respect for the environmental features which are present. Investment Level 4 indicates where State investments will support agricultural preservation, natural resource protection, and the continuation of the rural nature of these areas. The Office of State Planning does not support the residential development in the Level 4 area and we ask that the homes planned in the Level 4 area be removed from the site plan.

122 Martin Luther King Jr. Blvd. South – Haslet Armory · Third Floor · Dover, DE 19901

Code Requirements/Agency Permitting Requirements

Department of Transportation – Contact Bill Brockenbrough 760-2109

- The site access on Williamsville Road (Sussex Road 395) must be designed in accordance with DelDOT's Development Coordination Manual, which is available at <http://www.deldot.gov/Business/subdivisions/index.shtml?dc=changes>.
- Pursuant to Section 1.3 of the Manual, a Pre-Submittal Meeting is required before plans are submitted for review. The form needed to request the meeting and guidance on what will be covered there and how to prepare for it is located at https://www.deldot.gov/Business/subdivisions/pdfs/Meeting_Request_Form.pdf?08022017.
- Section 1.6 of the Manual addresses the location of development entrances. The site access must be located in accordance with that section and specifically in accordance with Figure 1.5.1 which is referenced therein.
- Section 1.7 of the Manual addresses fees that are assessed for the review of development proposals. DelDOT anticipates collecting the Initial Stage Fee when the record plan is submitted for review and the Construction Stage Fee when construction plans are submitted for review.
- Per Section 2.2.2.1 of the Manual, Traffic Impact Studies (TIS) are warranted for developments generating more than 500 vehicle trip ends per day or 50 vehicle trip ends per hour in any hour of the day. From the PLUS application, the total daily trips are estimated at 489 vehicle trip ends per day. Using the 10th edition of the Institute of Transportation Engineers' Trip Generation Manual, DelDOT estimates the trip generation of 41 single-family detached houses at 458 vehicle trip ends per day and the weekday morning and evening peak hour trip ends at 34 and 43, respectively. Therefore, a TIS is not warranted.

The purpose of a TIS is to determine what off-site improvements are needed to support a proposed development. DelDOT anticipates requiring the developer to improve Williamsville Road, within the limits of their projected frontage, that is from the south limits of their parcel frontage to the north limits of the David R. Kohout property (Tax Parcel No. 533-19.00-289.09) frontage, to meet DelDOT's Local Road standards, which include 11-foot lanes and 5-foot shoulders.

- As necessary, in accordance with Section 3.2.5 and Figure 3.2.5-a of the Manual, DelDOT will require dedication of right-of-way along the site's frontage on Williamsville Road. By this regulation, this dedication is to provide a minimum of 30 feet of right-of-way from the physical centerline. The following right-of-way dedication note is required, **"An X-foot wide right-of-way is hereby dedicated to the State of Delaware, as per this plat."**

- In accordance with Section 3.2.5.1.2 of the Manual, DelDOT will require the establishment of a 15-foot wide permanent easement across the property frontage. The location of the easement shall be outside the limits of the ultimate right-of-way. The easement area can be used as part of the open space calculation for the site. The following note is required, **“A 15-foot wide permanent easement is hereby established for the State of Delaware, as per this plat.”**
- Referring to Section 3.4.2.1 of the Manual, the following items, among other things, are required on the Record Plan:
 - A Traffic Generation Diagram. See Figure 3.4.2-a for the required format and content.
 - Depiction of all existing entrances within 600 feet of the entrance on Williamsville Road.
 - Notes identifying the type of off-site improvements, agreements (signal, letter) contributions and when the off-site improvements are warranted.
- Section 3.5.4.2 of the Manual addresses requirements for Shared Use Paths (SUP) and sidewalks. For projects in Level 3 and 4 Investment Areas, installation of paths or sidewalks along the frontage on State-maintained roads is at DelDOT’s discretion but given the largely developed nature of the surrounding area, DelDOT anticipates requiring the developer to build an SUP along their frontage on Williamsville Road.
- In accordance with Section 3.8 of the Manual, storm water facilities, excluding filter strips and bioswales, shall be located a minimum of 20 feet from the ultimate State right-of-way along Williamsville Road.
- In accordance with Section 5.2.9 of the Manual, the Auxiliary Lane Worksheet should be used to determine whether auxiliary lanes are warranted at the site entrances and how long those lanes should be. The worksheet can be found at <http://www.deldot.gov/Business/subdivisions/index.shtml>.
- In accordance with Section 5.4 of the Manual, sight distance triangles are required and shall be established in accordance with American Association of State Highway and Transportation Officials (AASHTO) standards. A spreadsheet has been developed to assist with this task. It can be found at <http://www.deldot.gov/Business/subdivisions/index.shtml>.
- In accordance with Section 5.14 of the Manual, all existing utilities must be shown on the plan and a utility relocation plan will be required for any utilities that need to be relocated.

Department of Natural Resources and Environmental Control – Beth Krumrine 735-3480
Special Flood Hazard Area

- The project application appears to be referencing outdated floodplain maps. According to the newest Flood Insurance Rate Maps (FIRM), this parcel is situated within the 100-year floodplain (1% annual chance of flooding), also referred to as a Special Flood Hazard Area. This is the area where the National Flood Insurance Program's floodplain management regulations must be enforced, and the mandatory purchase of flood insurance applies under some circumstances.
- The applicant must comply with local floodplain ordinance and regulations applicable to development or construction within the floodplain. In determining the boundary of the floodplain, use the most recent FIRM maps available, which can be found at <https://maps.dnrec.delaware.gov/floodplanning/default.html>.
- Contact: DNREC Shoreline and Waterway Management Section at (302) 739-9921. Website: <http://www.dnrec.delaware.gov/swc/Drainage/Pages/Flooding.aspx>

Stormwater Management

- Land disturbing activity (soil disturbance) has met the minimum threshold of 5000 square feet triggering Sediment and Stormwater Plan requirements.
- Projects disturbing greater than 5,000 square feet require the development and approval of a Sediment and Stormwater Plan prior to any land disturbing activity taking place on the site. The plan must be approved by the appropriate agency. This agency will vary depending on the location of the project, or whether is operated by a state agency or school district. The appropriate agency for this project is identified below.
- Additionally, construction activities that exceed 1.0 acre of land disturbance require Construction General Permit coverage through submittal of an electronic Notice of Intent for Stormwater Discharges Associated with Construction Activity. This form must be submitted electronically (<https://apps.dnrec.state.de.us/eNOI/default.aspx>) to the DNREC Division of Watershed Stewardship, along with the \$195 fee.
- Schedule a project application meeting with the appropriate agency prior to moving forward with the stormwater and site design. As part of this process, you must submit a Stormwater Assessment Study.
- Appropriate plan review agency contact: Sussex Conservation District at (302) 856-2105. Website: <https://www.sussexconservation.org/>

- General stormwater contact: DNREC Sediment and Stormwater Program at (302) 739-9921.
E-mail: DNREC.Stormwater@delaware.gov.
Website: <http://www.dnrec.delaware.gov/swc/Pages/SedimentStormwater.aspx>.

Water Quality

- This site lies within the Inland Bays Watershed, where pollution control strategies exist for nutrient and sediment.
- If zoning is approved and the site is developed, please consult with the Sussex Conservation District to determine if stricter stormwater management standards may apply for development in this area.
- Contact: Sussex Conservation District at (302) 856-2105. Website: <https://www.sussexconservation.org/>

Hydric Soils Group

- Poorly drained soils (Hydric Soils Group B/D) exist on the southern portion of the parcel and the western portion of the parcel (Hydric Soils Group A/D soils). The northwestern third of the parcel is comprised of B soils (moderately well drained).
- Types C and D soils are not conducive to infiltration stormwater Best Management Practices (BMPs) such as bioretention and infiltration basins, which must meet minimum infiltration requirements. All BMPs that propose to use infiltration or natural recharge shall include a soils investigation.
- Contact: DNREC Sediment and Stormwater Program at (302) 739-9921.
E-mail: DNREC.Stormwater@delaware.gov.
Website: <http://www.dnrec.delaware.gov/swc/Pages/SedimentStormwater.aspx>.

Wetlands

- Tidal wetlands exist along the southern edge of the property boundary. Approximately half of the site consists of forested freshwater wetlands, situated in the center of the parcel. According to the project application, a wetland delineation has been completed, and the USACE has signed off on the delineation. According to the applicant, there will be no disturbance to wetland areas, with a buffer of 50' from tidal wetlands, and a buffer of 25' from non-tidal wetlands.

Open Space

- This project proposes open space of 10.09 acres.

- A nutrient management plan is required for all persons or entities who apply nutrients to lands or areas of open space of 10 acres or more.
- Contact: Delaware Department of Agriculture's Nutrient Management Program at (302) 698-4558. Website: <https://agriculture.delaware.gov/nutrient-management/>

State Historic Preservation Office – Contact Carlton Hall 736-7400

- Prehistoric potential is low to moderate. Most of the land is poorly drained soils and there are no comparable sites nearby. Some water/marsh is within distance but there don't appear to be any relic streams/rivers nearby on Beers.
- Historic potential is low to moderate, it appears that the land was potentially owned by Captain J. Bishop (Bishops Cemetery is just north of the parcel). Buildings appear on the historic topographic maps, but this land is open and agricultural. Any archaeological remains that appear may be 19th century field scatter.
- If any project or development proceeds, the developer should be aware of the Unmarked Human Burials and Human Skeletal Remains Law (Del. C. Title 7, Ch. 54).
- If there is federal involvement, in the form of licenses, permits, or funds, the federal agency, often through its client, is responsible for complying with Section 106 of the National Historic Preservation Act (36 CFR 800) and must consider their project's effects on any known or potential cultural or historic resources. For further information on the Section 106 process please review the Advisory Council on Historic Preservation's website at: www.achp.gov

Delaware State Fire Marshall's Office – Contact Duane Fox 259-7037

At the time of formal submittal, the applicant shall provide; completed application, fee, and three sets of plans depicting the following in accordance with the Delaware State Fire Prevention Regulation:

Fire Protection Water Requirements:

- Where a water distribution system is proposed for single-family dwellings it shall be capable of delivering at least 500 gpm for 1-hour duration, at 20-psi residual pressure. Fire hydrants with 1000 feet spacing on centers are required.
- The infrastructure for fire protection water shall be provided, including the size of water mains.

Accessibility:

- The access road to the subdivision from Williamsville Road must be constructed so fire department apparatus may negotiate it. If a “center island” is placed at an entrance into the subdivision, it shall be arranged in such a manner that it will not adversely affect quick and unimpeded travel of fire apparatus into the subdivision.

Additionally, where trees are to be situated adjacent to travel roads in the subdivision, some forethought should be exercised regarding how future growth of the trees may affect fire department travel throughout the subdivision.

- Fire department access shall be provided in such a manner so that fire apparatus will be able to locate within 100 ft. of the front door.
- Any dead-end road more than 300 feet in length shall be provided with a turn-around or cul-de-sac arranged such that fire apparatus will be able to turn around by making not more than one backing maneuver. The dimensions of the cul-de-sac or turn-around shall be shown on the final plans. Also, please note that parking is prohibited in the cul-de-sac or turn around.
- The use of speed bumps or other methods of traffic speed reduction must be in accordance with Department of Transportation requirements.
- The local Fire Chief, prior to any submission to our Agency, shall approve in writing the use of gates that limit fire department access into and out of the development or property.

Required Notes:

- Provide a note on the final plans submitted for review to read “All fire lanes, fire hydrants, and fire department connections shall be marked in accordance with the Delaware State Fire Prevention Regulations”
- Name of Water Supplier
- Proposed Use
- National Fire Protection Association (NFPA) Construction Type
- Maximum Height of Buildings (including number of stories)
- Provide Road Names, even for County Roads

Recommendations/Additional Information

This section includes a list of site-specific suggestions that are intended to enhance the project. These suggestions have been generated by the State Agencies based on their expertise and subject area knowledge. **These suggestions do not represent State code requirements.** They are offered here in order to provide proactive ideas to help the applicant enhance the site design,

and it is hoped (**but in no way required**) that the applicant will open a dialogue with the relevant agencies to discuss how the suggestions can benefit the project.

Department of Transportation – Contact Bill Brockenbrough 760-2109

- The applicant should expect a requirement that any substation and/or wastewater facilities will be required to have access from an internal driveway with no direct access to Williamsville Road.
- The applicant should expect a requirement that all PLUS and Technical Advisory Committee (TAC) comments be addressed prior to submitting plans for review.
- Please be advised that the Standard General Notes have been updated and posted to the DelDOT website. Please begin using the new versions and look for the revision dates of March 21, 2019 and March 25, 2019. The notes can be found at <https://www.deldot.gov/Business/subdivisions/>.

Department of Natural Resources and Environmental Control – Beth Krumrine 735-3480
Concerns Identified Within the Development Footprint

Sea Level Rise

- The majority of this site is vulnerable to permanent inundation as a result of sea level rise. By 2050, sea levels are projected to rise by 0.7 – 1.9 feet; by end of century sea levels are projected to increase by 1.7 – 5.0 feet. In addition to permanent inundation of land, higher tide levels caused by sea level rise will result in increasing frequency and severity of flood events.
- In areas of future sea level rise, avoid construction of permanent structures and infrastructure, particularly those below 3 feet mean higher high water. All infrastructure and structures on site should incorporate the effects of sea level rise through the expected lifespan of the structures. This may include increasing freeboard of structures, ensuring that critical infrastructure is elevated to withstand future sea level rise, construction of flood control measures, and incorporating green infrastructure for flood control.
- Contact: DNREC Climate and Sustainability Section at (302) 735-3480.
Website: <https://dnrec.alpha.delaware.gov/climate-coastal-energy/climate-change/flood-risk-avoidance/>

Special Flood Hazard Area

- Design proposed structures outside of the Special Flood Hazard Area. If this is not possible, the developer should consider designing structures to a higher standard to avoid potential future flood damage and loss.

Stormwater Management

- Integrate runoff reduction techniques including infiltration basins, bioretention (rain gardens), filter strips, and pavers to encourage on-site stormwater infiltration and reduce overall runoff including pollutant runoff.
- For improved stormwater management on any site, preserve existing trees, wetlands, and passive open space. Trees and shrubs native to Delaware should be used to the maximum extent practicable in the landscaping for open spaces.

Wetlands

- To protect the function and integrity of wetlands, incorporate a 100-foot vegetated buffer from the edge of any wetland (both tidal and non-tidal), where feasible. Buffers are an integral component of aquatic and wetland habitats. Buffers reduce sediment and pollutants that may enter a waterway, which can negatively impact aquatic organisms and habitat.

Forest Removal

- Forested lands exist on the site.
- Removing forested areas for development should be avoided to the greatest extent possible. These areas provide habitat for wildlife, uptake nutrients, infiltrate stormwater, and improve water quality. Forests also provide shading and cooling, while reduce carbon that contributes to climate change.
- A forest assessment should be conducted to determine if mature forest resources exist on the property and to delineate their boundaries. If mature forests are found, DNREC recommends that these areas be conserved to the fullest extent possible.

Nuisance Waterfowl

- Wet ponds created for stormwater management purposes may attract resident Canada geese and mute swans that will create a nuisance for community residents. High concentrations of waterfowl in ponds create water-quality problems, leave droppings on

lawn and paved areas and can become aggressive during the nesting season. Short manicured lawns surrounding ponds provide attractive habitat for these species.

- To deter waterfowl from taking up residence in these ponds, DNREC recommends planting the surrounding open space with a mix of native wildflower plantings (to be planted in accordance with the Sediment and Stormwater Plan approval agency requirements). It is best to mow the open space area surrounding the pond only once a year, either in February or March. If mowing must occur more often, it would be helpful to leave a minimum buffer of 15 to 30 feet in width to be mowed, annually. This area would be necessary to adequately deter the waterfowl from inhabiting the area. In addition to deterring nuisance waterfowl, the native wildflower mix will also serve to attract bees, butterflies, and other pollinators, and reduce run-off, which can contain oil and other pollutants that homeowners may use on their lawns and driveways.

Street Curbs

- Small animals, such as turtles and salamanders, have difficulty climbing vertical curbs. Designing the development to exclude curbs is best for these species; however, if road curbing is part of the design, curbing that allows small animals to climb out of the roadbed (such as Cape Cod curbing) is preferred over steep, vertical curbing.

Additional Sustainable Practices

Air Pollution and Greenhouse Gas Reduction

- Use efficient Energy Star rated products and materials in construction and redevelopment to lessen the power source emissions of the project and costs. Every percentage of energy efficiency translates into a percent reduction in pollution. Renewable energy infrastructure such as solar or geothermal will further reduce pollution created from offsite generation. Energy efficiency upgrades for your project may be eligible for funding through the Division of Climate, Coastal, & Energy. Website: www.de.gov/greenenergy, www.de.gov/eeif.
- Install electric vehicle charging infrastructure to assist Delaware in achieving its clean transportation goals. The Division of Climate, Coastal, & Energy offers incentives for clean transportation (electric vehicle charging). These programs address climate change goals of reducing greenhouse gas emissions and improving overall air quality Website: www.de.gov/cleantransportation.
- Air pollution is also directly related to increased motorized transportation activity. Incorporating nonmotorized connectivity and installing bicycle racks where feasible will help to facilitate non-vehicular travel modes.
- Air pollution from new construction is generated through the use of maintenance equipment, paints, and consumer products like roof coatings and primers. Use of structural paint coatings that are low in Volatile Organic Compounds will help protect air quality.

Solid Waste Reduction

- The applicant should consider the use of recycled materials, such as reclaimed asphalt pavement, to reduce landfill waste, heat island effects on paved surfaces, and pavement costs.
- Include space for recycling dumpsters within the preliminary site design stage. These can be placed adjacent to trash dumpsters.

Delaware State Fire Marshall's Office – Contact Duane Fox 259-7037

- Although not a requirement of the State Fire Prevention Regulations, the Office of the State Fire Marshal encourages home builders to consider the benefits of home sprinkler protection in dwellings. The Office of the State Fire Marshal also reminds home builders that they are obligated to comply with requirements of Subchapter III of Chapter 36 of Title 6 of the Delaware Code which can be found at the following website:
<http://delcode.delaware.gov/title6/c036/sc03/index.shtml>
- Preliminary meetings with fire protection specialists are encouraged prior to formal submittal. Please call for appointment. Applications and brochures can be downloaded from our website: www.statefiremarshal.delaware.gov, technical services link, plan review, applications or brochures.

Sussex County Housing – Contact: Brandy Nauman 855-7779

- Sussex County endeavors to promote non-discrimination and affordable housing whenever possible throughout the County. In this regard, the developer and associated financial institutions are encouraged to provide and finance affordable housing opportunities to Sussex County residents in all new developments, and affirmatively market those affordable housing units to diverse populations.
- For questions about opportunities available for affordable housing projects within Sussex County, please consult Sussex County's "Affordable Housing Support Policy". The policy along with other resources are available on the County's Affordable & Fair Housing Resource Center website: www.sussexcountycle.gov/affordable-and-fair-housing-resource-center. The County's Community Development & Housing Department can advise about existing affordable housing opportunities in Sussex County and the appropriate County Department to contact regarding specific development issues concerning future affordable housing projects within Sussex County.
- The Community Development & Housing Department can also explain and assist with any financial support or incentives that may be available to a project from federal, state and county sources, as well as private funding sources that also promote affordable housing in Sussex County.

- Please understand that all residential projects, including Affordable Housing Projects are subject to the applicable provisions of the Sussex County Subdivision and Zoning Codes, and the approval processes set forth in those Codes.

Following receipt of this letter and upon filing of an application with the local jurisdiction, the applicant shall provide to the local jurisdiction and the Office of State Planning Coordination a written response to comments received as a result of the pre-application process, noting whether comments were incorporated into the project design or not and the reason, therefore.

Thank you for the opportunity to review this project. If you have any questions, please contact me at 302-739-3090.

Sincerely,

A handwritten signature in cursive script that reads "Constance C. Holland". The signature is written in dark ink on a white background.

Constance C. Holland, AICP
Director, Office of State Planning Coordination

PLUS Review – 2020-08-09
GMB # R200123

Dear Ms. Holland:

Please accept this letter as the formal response to the Office of State Planning Coordination PLUS review comments dated, September 24, 2020, for the above referenced project. The original State Agency comments are included below with our responses highlighted in red and italicized.

Sincerely,

Stephen L. Marsh, P. E.
Sr. Vice President

Attn: Mr. Lawton Myrick

Strategies for State Policies and Spending

This project is located in Investment Levels 3 and 4 according to the 2020 Strategies for State Policies and Spending. Investment Level 3 reflects areas where growth is anticipated by local, county, and state plans in the longer-term future, or areas that may have environmental or other constraints to development. State investments may support future growth in these areas but may have priorities for the near future. Level 3 areas may also mean that there are environmental concerns on or near the parcel and we would encourage you to design the site with respect for the environmental features which are present. Investment Level 4 indicates where State investments will support agricultural preservation, natural resource protection, and the continuation of the rural nature of these areas. The Office of State Planning does not support the residential development in the Level 4 area, and we ask that the homes planned in the Level 4 area be removed from the site plan.

We disagree with the categorization of Level 3 and 4, due to the nature of existing development surrounding the proposed site. There has been considerable infrastructure investment in the immediate area, including extension of sewer along Route 54, repaving of Route 54, and extension of water main infrastructure by Artesian to serve nearby development. The Master Planned Community, Americana Bayside is across Williamsville Road. However, we will consider all environmental concerns as part of the planning and design process.

Code Requirements/Agency Permitting Requirements

Department of Transportation – Contact Bill Brockenbrough 760-2109

- The site access on Williamsville Road (Sussex Road 395) must be designed in accordance with DeIDOT's Development Coordination Manual, which is available at <http://www.deldot.gov/Business/subdivisions/index.shtml?dc=changes>.
- Pursuant to Section 1.3 of the Manual, a Pre-Submittal Meeting is required before plans are submitted for review. The form needed to request the meeting and guidance on what will be covered there and how to prepare for it is located at https://www.deldot.gov/Business/subdivisions/pdfs/Meeting_Request_Form.pdf?08022017.

A pre-application meeting was held on December 10th, 2020.

- Section 1.6 of the Manual addresses the location of development entrances. The site access must be located in accordance with that section and specifically in accordance with Figure 1.5.1 which is referenced therein.

The development entrance will be designed in accordance with DeIDOT standards and based upon traffic volume for a community of this size.

- Section 1.7 of the Manual addresses fees that are assessed for the review of development proposals. DelDOT anticipates collecting the Initial Stage Fee when the record plan is submitted for review and the Construction Stage Fee when construction plans are submitted for review.

Payment of fees associated with record plan submittal and construction plan submittal for review will be made at DelDOT's direction.

- Per Section 2.2.2.1 of the Manual, Traffic Impact Studies (TIS) are warranted for developments generating more than 500 vehicle trip ends per day or 50 vehicle trip ends per hour in any hour of the day. From the PLUS application, the total daily trips are estimated at 489 vehicle trip ends per day. Using the 10th edition of the Institute of Transportation Engineers' Trip Generation Manual, DelDOT estimates the trip generation of 41 single-family detached houses at 458 vehicle trip ends per day and the weekday morning and evening peak hour trip ends at 34 and 43, respectively. Therefore, a TIS is not warranted.

The purpose of a TIS is to determine what off-site improvements are needed to support a proposed development. DelDOT anticipates requiring the developer to improve Williamsville Road, within the limits of their projected frontage, that is from the south limits of their parcel frontage to the north limits of the David R. Kohout property (Tax Parcel No. 533-19.00-289.09) frontage, to meet DelDOT's Local Road standards, which include 11-foot lanes and 5-foot shoulders.

We agree that a TIS is not warranted for a 41-unit residential development. We plan to improve the frontage along Williamsville Road with appropriate auxiliary lanes as necessitated by DelDOT requirements.

- As necessary, in accordance with Section 3.2.5 and Figure 3.2.5-a of the Manual, DelDOT will require dedication of right-of-way along the site's frontage on Williamsville Road. By this regulation, this dedication is to provide a minimum of 30 feet of right-of-way from the physical centerline. The following right-of-way dedication note is required, **"An X-foot wide right-of-way is hereby dedicated to the State of Delaware, as per this plat."**

The Record Plan will include the Right of Way note "A 30-foot right-of-way from centerline of Williamsville Road is hereby established for the State of Delaware as per this plat" in accordance with Section 3.2.5-a of the DelDOT Development Coordination Manual.

- In accordance with Section 3.2.5.1.2 of the Manual, DelDOT will require the establishment of a 15-foot-wide permanent easement across the property frontage. The location of the easement shall be outside the limits of the ultimate right-of-way. The easement area can be used as part of the open space calculation for the site. The following note is required, **"A 15-foot-wide permanent easement is hereby established for the State of Delaware, as per this plat."**

The Record Plan will include the frontage easement note "A 15-foot permanent easement is hereby established for the State of Delaware as per this plat" in accordance with Section 3.2.5.1.2 of the DelDOT Development Coordination Manual to provide the required 15ft easement beyond the minimum right-of-way.

- Referring to Section 3.4.2.1 of the Manual, the following items, among other things, are required on the Record Plan:
 - A Traffic Generation Diagram. See Figure 3.4.2-a for the required format and content.
 - Depiction of all existing entrances within 600 feet of the entrance on Williamsville Road.
 - Notes identifying the type of off-site improvements, agreements (signal, letter) contributions and when the off-site improvements are warranted.

The Record Plan will be completed to include the above listed items in accordance with Section 3.4.2.1 of the DelDOT Development Coordination Manual.

- Section 3.5.4.2 of the Manual addresses requirements for Shared Use Paths (SUP) and sidewalks. For projects in Level 3 and 4 Investment Areas, installation of paths or sidewalks along the frontage on State-maintained roads is at DelDOT's discretion but given the largely developed nature of the surrounding area, DelDOT anticipates requiring the developer to build an SUP along their frontage on Williamsville Road.

The Record Plan will be completed to reflect a 15-foot-wide permanent easement beyond the right-of-way dedicated along the property frontage for the installation of a shared use path.

- In accordance with Section 3.8 of the Manual, storm water facilities, excluding filter strips and bioswales, shall be located a minimum of 20 feet from the ultimate State right-of-way along Williamsville Road.

Stormwater facilities will be sited appropriately to avoid conflicts with all DelDOT right-of-ways.

- In accordance with Section 5.2.9 of the Manual, the Auxiliary Lane Worksheet should be used to determine whether auxiliary lanes are warranted at the site entrances and how long those lanes should be. The worksheet can be found at <http://www.deldot.gov/Business/subdivisions/index.shtml>.

We plan to improve the frontage along Williamsville Road with appropriate auxiliary lanes per DelDOT's direction.

- In accordance with Section 5.4 of the Manual, sight distance triangles are required and shall be established in accordance with American Association of State Highway and Transportation Officials (AASHTO) standards. A spreadsheet has been developed to assist with this task. It can be found at <http://www.deldot.gov/Business/subdivisions/index.shtml>.

Sight Distance Triangles will be developed in accordance with Section 5.4 of the DeIDOT Development Coordination Manual as applicable

- In accordance with Section 5.14 of the Manual, all existing utilities must be shown on the plan and a utility relocation plan will be required for any utilities that need to be relocated.

Existing utilities will be shown as applicable and a utility relocation plan will be prepared to show any proposed utility relocations, if needed, in accordance with Section 5.14 of the DeIDOT Development Coordination Manual.

Department of Natural Resources and Environmental Control – Beth Krumrine 735-3480
Special Flood Hazard Area

- The project application appears to be referencing outdated floodplain maps. According to the newest Flood Insurance Rate Maps (FIRM), this parcel is situated within the 100-year floodplain (1% annual chance of flooding), also referred to as a Special Flood Hazard Area. This is the area where the National Flood Insurance Program's floodplain management regulations must be enforced, and the mandatory purchase of flood insurance applies under some circumstances.
- The applicant must comply with local floodplain ordinance and regulations applicable to development or construction within the floodplain. In determining the boundary of the floodplain, use the most recent FIRM maps available, which can be found at <https://maps.dnrec.delaware.gov/floodplanning/default.html>.

We have updated our Existing Conditions base map to reflect the most current floodplain data. This will ensure that we comply with all FEMA regulations and requirements. It is anticipated that homes will be constructed on pilings, but if not, the home foundations and finish floor elevations will be constructed to be out of the flood elevation and in accordance with FEMA regulations and Sussex County Code.

- Contact: DNREC Shoreline and Waterway Management Section at (302) 739-9921.
Website: <http://www.dnrec.delaware.gov/swc/Drainage/Pages/Flooding.aspx>

Stormwater Management

- Land disturbing activity (soil disturbance) has met the minimum threshold of 5000 square feet triggering Sediment and Stormwater Plan requirements.
- Projects disturbing greater than 5,000 square feet require the development and approval of a Sediment and Stormwater Plan prior to any land disturbing activity taking place on the site. The plan must be approved by the appropriate agency. This agency will vary depending on the location of the project, or whether is operated by a state agency or school district. The appropriate agency for this project is identified below.
- Additionally, construction activities that exceed 1.0 acre of land disturbance require Construction General Permit coverage through submittal of an electronic Notice of Intent for Stormwater Discharges Associated with Construction Activity. This form must be submitted electronically (<https://apps.dnrec.state.de.us/eNOI/default.aspx>) to the DNREC Division of Watershed Stewardship, along with the \$195 fee.
- Schedule a project application meeting with the appropriate agency prior to moving forward with the stormwater and site design. As part of this process, you must submit a Stormwater Assessment Study.
- Appropriate plan review agency contact: Sussex Conservation District at (302) 856-2105. Website: <https://www.sussexconservation.org/>
- General stormwater contact: DNREC Sediment and Stormwater Program at (302) 739-9921.
E-mail: DNREC.Stormwater@delaware.gov.
Website: <http://www.dnrec.delaware.gov/swc/Pages/SedimentStormwater.aspx>.

Comments noted. A Pre-Application Meeting with Sussex Conservation District was held on December 9, 2020, regarding Sediment and Erosion Control and Stormwater Management measures for the proposed development.

Water Quality

- This site lies within the Inland Bays Watershed, where pollution control strategies exist for nutrient and sediment.
- If zoning is approved and the site is developed, please consult with the Sussex Conservation District to determine if stricter stormwater management standards may apply for development in this area.
- Contact: Sussex Conservation District at (302) 856-2105. Website: <https://www.sussexconservation.org/>

We will incorporate green technology into the final design as much as possible. The proposed plan calls for buffers, which aid in water quality. The proposed development will

meet DNREC erosion and sediment control and stormwater management requirements, through plan approval at the Sussex Conservation District. However, please note that the site is not located in the Inland Bays Watershed, but rather in the Maryland Coastal Bays Watershed. Worcester County officials have declined requests to review our nutrient removal calculations in the past.

Hydric Soils Group

- Poorly drained soils (Hydric Soils Group B/D) exist on the southern portion of the parcel and the western portion of the parcel (Hydric Soils Group A/D soils). The northwestern third of the parcel is comprised of B soils (moderately well drained).
- Types C and D soils are not conducive to infiltration stormwater Best Management Practices (BMPs) such as bioretention and infiltration basins, which must meet minimum infiltration requirements. All BMPs that propose to use infiltration or natural recharge shall include a soils investigation.
- Contact: DNREC Sediment and Stormwater Program at (302) 739-9921.
E-mail: DNREC.Stormwater@delaware.gov.
Website: <http://www.dnrec.delaware.gov/swc/Pages/SedimentStormwater.aspx>.

ERI has already completed a comprehensive delineation of State and Federally regulated wetlands and waters within this project site. ERI has confirmed that hydric soils do not extend beyond wetland areas. As such, no development is proposed on hydraulic soils.

Wetlands

- Tidal wetlands exist along the southern edge of the property boundary. Approximately half of the site consists of forested freshwater wetlands, situated in the center of the parcel. According to the project application, a wetland delineation has been completed, and the USACE has signed off on the delineation. According to the applicant, there will be no disturbance to wetland areas, with a buffer of 50' from tidal wetlands, and a buffer of 25' from non-tidal wetlands.

ERI completed a comprehensive delineation of State and Federally regulated wetlands and waters within the project site. A Jurisdictional Determination was approved by the USACOE on May 29, 2018. The proposed development will not impact any wetlands other than Stormwater Management outfalls to tidal waters, which will receive appropriate permits. The development will maintain a minimum buffer of 50' from tidal wetlands and waters and a minimum 25' buffer from non-tidal wetlands.

Open Space

- This project proposes open space of 10.09 acres.
- A nutrient management plan is required for all persons or entities who apply nutrients to lands or areas of open space of 10 acres or more.

- Contact: Delaware Department of Agriculture's Nutrient Management Program at (302) 698-4558. Website: <https://agriculture.delaware.gov/nutrient-management/>

Most of the open space consists of non-tidal wooded wetlands. These areas will be preserved in their natural state and no nutrients will be applied here. There is minimal planned removal of forested uplands areas. Most of the area proposed to be disturbed was previously farmed and maintained open fields through agricultural operations. Buffer areas will be planted with native species. Common open space areas, such as around the proposed amenity, will follow a nutrient management plan.

State Historic Preservation Office – Contact Carlton Hall 736-7400

- Prehistoric potential is low to moderate. Most of the land is poorly drained soils and there are no comparable sites nearby. Some water/marsh is within distance but there don't appear to be any relic streams/rivers nearby on Beers.
- Historic potential is low to moderate, it appears that the land was potentially owned by Captain J. Bishop (Bishops Cemetery is just north of the parcel). Buildings appear on the historic topographic maps, but this land is open and agricultural. Any archaeological remains that appear may be 19th century field scatter.
- If any project or development proceeds, the developer should be aware of the Unmarked Human Burials and Human Skeletal Remains Law (Del. C. Title 7, Ch. 54).
- If there is federal involvement, in the form of licenses, permits, or funds, the federal agency, often through its client, is responsible for complying with Section 106 of the National Historic Preservation Act (36 CFR 800) and must consider their project's effects on any known or potential cultural or historic resources. For further information on the Section 106 process please review the Advisory Council on Historic Preservation's website at: www.achp.gov

If any unmarked graves or human remains are found during construction, the developer will stop work and contact the State's Historic Preservation Office (SHPO) immediately.

Delaware State Fire Marshall's Office – Contact Duane Fox 259-7037

At the time of formal submittal, the applicant shall provide; completed application, fee, and three sets of plans depicting the following in accordance with the Delaware State Fire Prevention Regulation:

Fire Protection Water Requirements:

- Where a water distribution system is proposed for single-family dwellings, it shall be capable of delivering at least 500 gpm for 1-hour duration, at 20-psi residual pressure. Fire hydrants with 1000 feet spacing on centers are required.
- The infrastructure for fire protection water shall be provided, including the size of water mains.

Comments noted. Artesian water main will be extended to the project site and water distribution with fire protection will be provided.

Accessibility:

- The access road to the subdivision from Williamsville Road must be constructed so fire department apparatus may negotiate it. If a “center island” is placed at an entrance into the subdivision, it shall be arranged in such a manner that it will not adversely affect quick and unimpeded travel of fire apparatus into the subdivision.

Additionally, where trees are to be situated adjacent to travel roads in the subdivision, some forethought should be exercised regarding how future growth of the trees may affect fire department travel throughout the subdivision.

- Fire department access shall be provided in such a manner so that fire apparatus will be able to locate within 100 ft. of the front door.
- Any dead-end road more than 300 feet in length shall be provided with a turn-around or cul-de-sac arranged such that fire apparatus will be able to turn around by making not more than one backing maneuver. The dimensions of the cul-de-sac or turn-around shall be shown on the final plans. Also, please note that parking is prohibited in the cul-de-sac or turn around.
- The use of speed bumps or other methods of traffic speed reduction must be in accordance with Department of Transportation requirements.
- The local Fire Chief, prior to any submission to our Agency, shall approve in writing the use of gates that limit fire department access into and out of the development or property.

We will provide all required accessibility within the site for emergency vehicle apparatus.

Required Notes:

- Provide a note on the final plans submitted for review to read “All fire lanes, fire hydrants, and fire department connections shall be marked in accordance with the Delaware State Fire Prevention Regulations”.
- Name of Water Supplier
- Proposed Use
- National Fire Protection Association (NFPA) Construction Type
- Maximum Height of Buildings (including number of stories)
- Provide Road Names, even for County Roads.

We will provide the proper notes and details on the plan sets submitted to the Office of the State Fire Marshal for their approval.

Recommendations/Additional Information

This section includes a list of site-specific suggestions that are intended to enhance the project. These suggestions have been generated by the State Agencies based on their expertise and subject area knowledge. **These suggestions do not represent State code requirements.** They are offered here in order to provide proactive ideas to help the applicant enhance the site design, and it is hoped (**but in no way required**) that the applicant will open a dialogue with the relevant agencies to discuss how the suggestions can benefit the project.

Department of Transportation – Contact Bill Brockenbrough 760-2109

- The applicant should expect a requirement that any substation and/or wastewater facilities will be required to have access from an internal driveway with no direct access to Williamsville Road.
- The applicant should expect a requirement that all PLUS and Technical Advisory Committee (TAC) comments be addressed prior to submitting plans for review.
- Please be advised that the Standard General Notes have been updated and posted to the DelDOT website. Please begin using the new versions and look for the revision dates of March 21, 2019 and March 25, 2019. The notes can be found at <https://www.deldot.gov/Business/subdivisions/>.

Comments noted. See previous sections for DelDOT comments and responses.

Department of Natural Resources and Environmental Control – Beth Krumrine 735-3480 **Concerns Identified Within the Development Footprint**

Sea Level Rise

- The majority of this site is vulnerable to permanent inundation as a result of sea level rise. By 2050, sea levels are projected to rise by 0.7 – 1.9 feet; by end of century sea levels are projected to increase by 1.7 – 5.0 feet. In addition to permanent inundation of land, higher tide levels caused by sea level rise will result in increasing frequency and severity of flood events.
- In areas of future sea level rise, avoid construction of permanent structures and infrastructure, particularly those below 3 feet mean higher high water. All infrastructure and structures on site should incorporate the effects of sea level rise through the expected lifespan of the structures. This may include increasing freeboard of structures, ensuring that critical infrastructure is elevated to withstand future sea level rise, construction of flood control measures, and incorporating green infrastructure for flood control.
- Contact: DNREC Climate and Sustainability Section at (302) 735-3480.
Website: <https://dnrec.alpha.delaware.gov/climate-coastal-energy/climate-change/flood-risk-avoidance/>

Our intent is for the homes to be built on pilings. As such, the first floor of main living area will be well out of the flood zone. If crawl space foundations are ultimately decided upon, the finished grade adjacent to the home will be constructed out of the Zone AE 5' elevation required by FEMA. Finish floor elevations will be raised in accordance with FEMA regulations and Sussex County code. Furthermore, we will consider proposed sea level rise in the road, site grading designs, and final Finish Floor Elevations of the homes.

Special Flood Hazard Area

- Design proposed structures outside of the Special Flood Hazard Area. If this is not possible, the developer should consider designing structures to a higher standard to avoid potential future flood damage and loss.

Comments noted.

Stormwater Management

- Integrate runoff reduction techniques including infiltration basins, bioretention (rain gardens), filter strips, and pavers to encourage on-site stormwater infiltration and reduce overall runoff including pollutant runoff.
- For improved stormwater management on any site, preserve existing trees, wetlands, and passive open space. Trees and shrubs native to Delaware should be used to the maximum extent practicable in the landscaping for open spaces.

There is minimal planned removal of forested uplands areas. All areas proposed to be disturbed were previously farmed and maintained open fields through agricultural operations. Buffer areas will be planted with native species. Regarding on-site infiltration, the site is relatively low, and we do not anticipate enough separation from seasonal highwater table for infiltration practices. We will employ appropriate SWM Best Management Practices in our site design.

Wetlands

- To protect the function and integrity of wetlands, incorporate a 100-foot vegetated buffer from the edge of any wetland (both tidal and non-tidal), where feasible. Buffers are an integral component of aquatic and wetland habitats. Buffers reduce sediment and pollutants that may enter a waterway, which can negatively impact aquatic organisms and habitat.

We are providing a 50' minimum buffer from tidal wetlands and waters and a 25' voluntary buffer from non-tidal wetlands. We agree appropriately sized buffers provide many benefits to water quality and wildlife habitat.

Forest Removal

- Forested lands exist on the site.
- Removing forested areas for development should be avoided to the greatest extent possible. These areas provide habitat for wildlife, uptake nutrients, infiltrate stormwater, and improve water quality. Forests also provide shading and cooling, while reduce carbon that contributes to climate change.
- A forest assessment should be conducted to determine if mature forest resources exist on the property and to delineate their boundaries. If mature forests are found, DNREC recommends that these areas be conserved to the fullest extent possible.

There is minimal planned removal of forested uplands areas. All areas proposed to be disturbed were previously farmed and maintained open fields through agricultural operations. Buffer areas will be planted with native species.

Nuisance Waterfowl

- Wet ponds created for stormwater management purposes may attract resident Canada geese and mute swans that will create a nuisance for community residents. High concentrations of waterfowl in ponds create water-quality problems, leave droppings on lawn and paved areas and can become aggressive during the nesting season. Short, manicured lawns surrounding ponds provide attractive habitat for these species.
- To deter waterfowl from taking up residence in these ponds, DNREC recommends planting the surrounding open space with a mix of native wildflower plantings (to be planted in accordance with the Sediment and Stormwater Plan approval agency requirements). It is best to mow the open space area surrounding the pond only once a year, either in February or March. If mowing must occur more often, it would be helpful to leave a minimum buffer of 15 to 30 feet in width to be mowed, annually. This area would be necessary to adequately deter the waterfowl from inhabiting the area. In addition to deterring nuisance waterfowl, the native wildflower mix will also serve to attract bees, butterflies, and other pollinators, and reduce run-off, which can contain oil and other pollutants that homeowners may use on their lawns and driveways.

Our design will allow for native plantings which are not to be mowed regularly adjacent to a few areas of mowed lawn that extends to the pond edge. We agree that Canada geese are a nuisance, but we also hope for residents to engage with the ponds for active and passive recreation.

Street Curbs

- Small animals, such as turtles and salamanders, have difficulty climbing vertical curbs. Designing the development to exclude curbs is best for these species; however, if road

curbing is part of the design, curbing that allows small animals to climb out of the roadbed (such as Cape Cod curbing) is preferred over steep, vertical curbing.

Our design calls for flat curb, which should allow for small animals to cross at their leisure.

Additional Sustainable Practices

Air Pollution and Greenhouse Gas Reduction

- Use efficient Energy Star rated products and materials in construction and redevelopment to lessen the power source emissions of the project and costs. Every percentage of energy efficiency translates into a percent reduction in pollution. Renewable energy infrastructure such as solar or geothermal will further reduce pollution created from offsite generation. Energy efficiency upgrades for your project may be eligible for funding through the Division of Climate, Coastal, & Energy. Website: www.de.gov/greenenergy, www.de.gov/eeif.
- Install electric vehicle charging infrastructure to assist Delaware in achieving its clean transportation goals. The Division of Climate, Coastal, & Energy offers incentives for clean transportation (electric vehicle charging). These programs address climate change goals of reducing greenhouse gas emissions and improving overall air quality Website: www.de.gov/cleantransportation.
- Air pollution is also directly related to increased motorized transportation activity. Incorporating nonmotorized connectivity and installing bicycle racks where feasible will help to facilitate non-vehicular travel modes.
- Air pollution from new construction is generated through the use of maintenance equipment, paints, and consumer products like roof coatings and primers. Use of structural paint coatings that are low in Volatile Organic Compounds will help protect air quality.

Comments noted. We will endeavor to incorporate energy efficient products and materials throughout the construction process.

Solid Waste Reduction

- The applicant should consider the use of recycled materials, such as reclaimed asphalt pavement, to reduce landfill waste, heat island effects on paved surfaces, and pavement costs.
- Include space for recycling dumpsters within the preliminary site design stage. These can be placed adjacent to trash dumpsters.

The Condominium Association will contract trash service and recycling pickup for the entire community.

Delaware State Fire Marshall's Office – Contact Duane Fox 259-7037

- Although not a requirement of the State Fire Prevention Regulations, the Office of the State Fire Marshal encourages home builders to consider the benefits of home sprinkler protection in dwellings. The Office of the State Fire Marshal also reminds home builders that they are obligated to comply with requirements of Subchapter III of Chapter 36 of Title 6 of the Delaware Code which can be found at the following website: <http://delcode.delaware.gov/title6/c036/sc03/index.shtml>
- Preliminary meetings with fire protection specialists are encouraged prior to formal submittal. Please call for appointment. Applications and brochures can be downloaded from our website: www.statefiremarshal.delaware.gov, technical services link, plan review, applications or brochures.

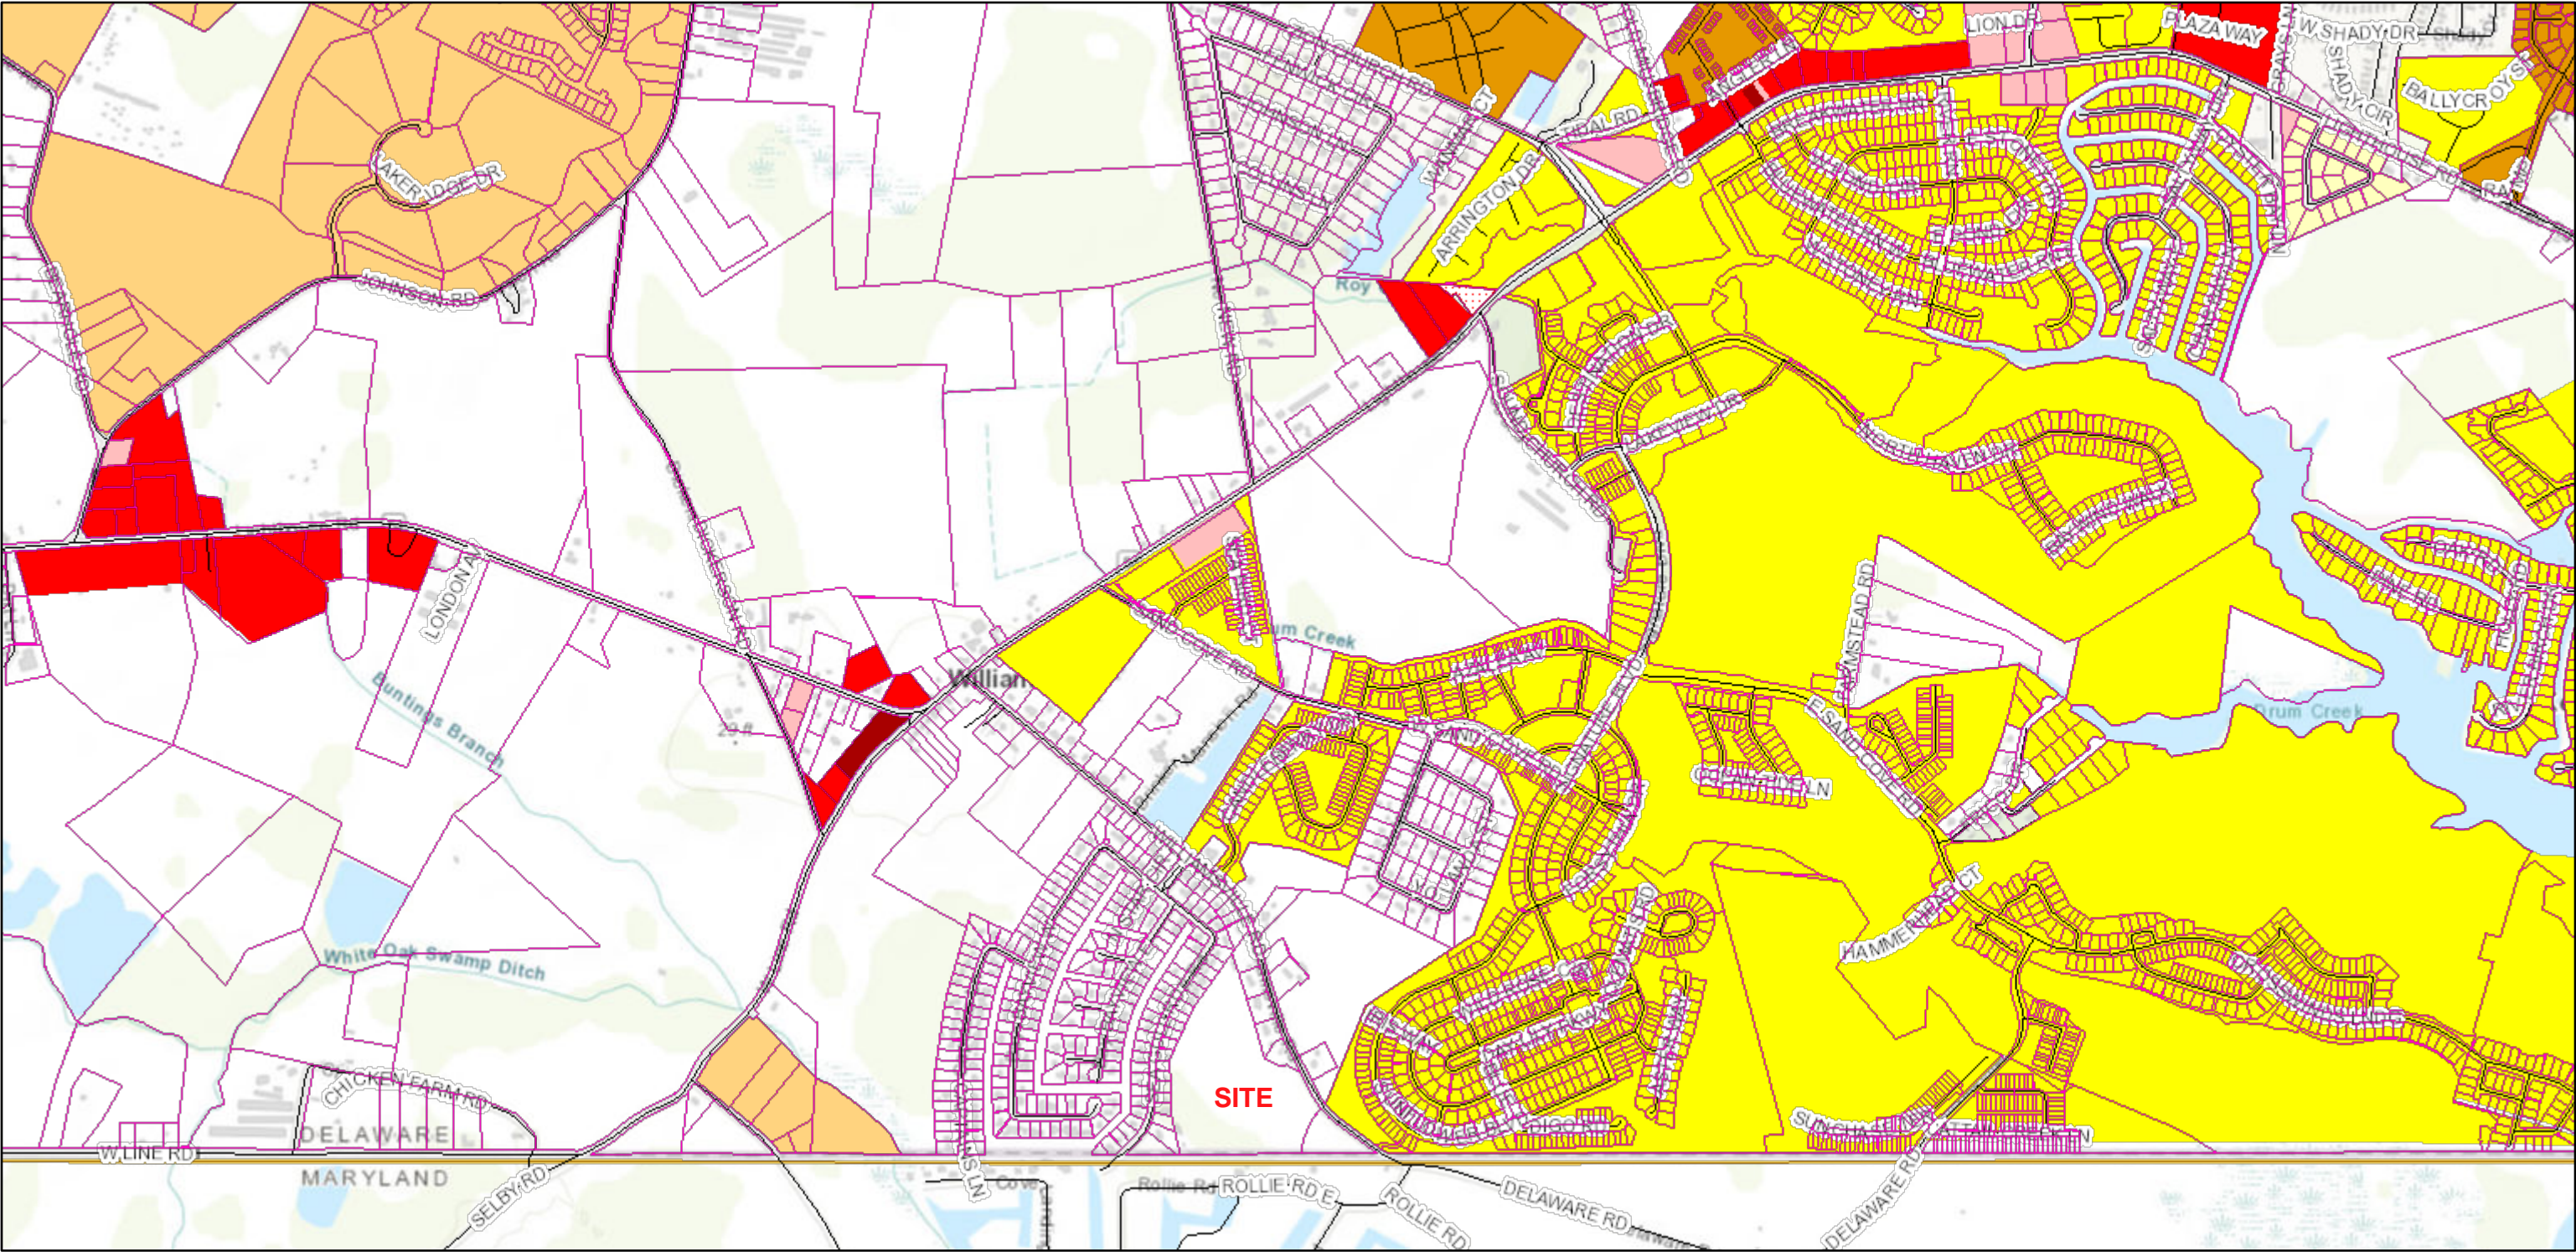

Comments noted.

Sussex County Housing – Contact: Brandy Nauman 855-7779

- Sussex County endeavors to promote non-discrimination and affordable housing whenever possible throughout the County. In this regard, the developer and associated financial institutions are encouraged to provide and finance affordable housing opportunities to Sussex County residents in all new developments, and affirmatively market those affordable housing units to diverse populations.
- For questions about opportunities available for affordable housing projects within Sussex County, please consult Sussex County's "Affordable Housing Support Policy". The policy along with other resources are available on the County's Affordable & Fair Housing Resource Center website: www.sussexcountyde.gov/affordable-and-fair-housing-resource-center. The County's Community Development & Housing Department can advise about existing affordable housing opportunities in Sussex County and the appropriate County Department to contact regarding specific development issues concerning future affordable housing projects within Sussex County.
- The Community Development & Housing Department can also explain and assist with any financial support or incentives that may be available to a project from federal, state and county sources, as well as private funding sources that also promote affordable housing in Sussex County.
- Please understand that all residential projects, including Affordable Housing Projects are subject to the applicable provisions of the Sussex County Subdivision and Zoning Codes, and the approval processes set forth in those Codes.

Comments noted. We will adhere to all applicable requirements of the Sussex County Subdivision and Zoning Code.

Bethany Beach, DE 19930

File No. 20-12853/CA

CORRECTIVE DEED

THIS DEED is made as of the 2nd day of ~~October~~ ^{November}, 2020, between, **Keith Coffin and Shelley Jenkins Coffin**, of 323 N. Heron Gull Court, Ocean City, MD 21843, parties of the first part, and **Mayapple Farm LLC, a Delaware limited liability company**, of 5973 Smithy's Lane, Salisbury, MD 21801, party of the second part.

WITNESSETH, that the said parties of the first part, for and in consideration of the sum of Ten Dollars (\$10.00), lawful money of the United States of America, the receipt whereof is hereby acknowledged, hereby grant and convey unto the said party of the second part, its successors and/or assigns, in fee simple, the following-described lands, situate, lying and being in **Sussex County**, State of Delaware:

BEGINNING at a ½" diameter iron pipe found on the westerly side of Williamsville Road, Sussex County Road Number 395 at the division line between the lands now or formerly of Carol A. Camelio (see Deed Book 1332, Page 199) and the lands of Keith Coffin and Shelley Jenkins Coffin (see Deed Book 5036, Page 49) labeled "Point of Beginning", on a Plot entitled "Boundary Survey Plan, Lands of Keith Coffin & Shelly Jenkins Coffin", dated June 9, 2020 and prepared by Cypress Surveys, LLC. The iron pipe found is approximately 1,707 feet measured along the westerly side of Williamsville Road from Bayview Boulevard.

THENCE leaving the lands of Camelio for the following course and distance with the bearings hereon referenced to the Delaware State Plane NAD83/2011;

- 1) **South 24°52'29" East a distance of 84.72 feet** to a capped pin set on the westerly Permanent Easement Line of Williamsville Road (see Deed Book 400, Page 160),

THENCE binding on the said easement line for the following two courses and distances;

- 2) **South 27°36'27" East a distance of 208.37 feet** to a capped pin set at a point of curvature,
- 3) By a curve to the left in a southeasterly direction, having a **radius of 425.00 feet**, an **arc length of 68.42 feet** and subtended by a **chord bearing and distance of South**

32°13'10" East 68.34 feet to a point in the centerline of ditch at the division line between the lands being described and the lands now or formerly of Christopher G. Megee and Wendy R. Megee (see Deed Book 5189, Page 327),

THENCE binding on the said lands of Megee for the following two courses and distances;

- 4) South 56°50'51" West a distance of 68.60 feet** to a capped pin found with identification cap stamped "Simpler" on the west bank of the said ditch,
- 5) South 20°16'31" West a distance of 274.64 feet** to a point in the ditch that bears North 89°16'47" East 10.00 feet from a $\frac{3}{4}$ " diameter iron pipe found on the westerly side of the ditch,

THENCE leaving the lands of Megee for the following course and distance;

- 6) South 00°47'27" West a distance of 26.71 feet** to a point in a canal on the Delaware Maryland Boundary Line, said point bears South 89°44'14" West 521.42 feet from NGS Station "Boundary Mon. EW 4 DE MD",

THENCE binding on the Delaware Maryland Boundary Line for the following course and distance;

- 7) South 89°44'14" West a distance of 826.05 feet** to a point in said canal on the Delaware Maryland Boundary Line, said point bears North 89°44'14" East 3,711.13 feet from NGS Station "Boundary Mon. EW 5 DE MD",

THENCE leaving the said canal and Delaware Maryland Boundary Line for the following course and distance;

- 8) North 13°40'36" West a distance of 20.63 feet** to a $\frac{3}{4}$ " diameter iron pipe found at the corner of Lot 34, Block 2 as shown on a plot entitled "Bay View Estates", recording date June 1, 1978 and filed for record at the Office of Recorder of Deeds in Plot Book 15, Page 8,

THENCE binding on Lot 34, Lot 33 and part of Lot 32 Block 2 for the following course and distance;

- 9) North 13°40'36" West** passing over a $\frac{3}{4}$ " diameter iron pipe found at a distance of 230.85 feet **for a total distance of 298.30 feet** to a capped pin set at a bent capped pin found,

THENCE binding on part of Lot 32 and on all of Lot 31, Lot 30, Lot 29, Lot 28 and part of Lot 27 Block 2 for the following course and distance;

- 10) North 02°23'19" West** passing over a capped pin found at a distance of 121.83 feet, a capped pin found at a distance of 196.86 feet and a $\frac{3}{4}$ " diameter iron pipe found at 272.23 feet **for a total distance of 409.44 feet** to a capped pin set,

THENCE binding on part of Lot 27 and all of Lot 26, Lot 25, Lot 24, Lot 23, Lot 22 and part of Lot 21 Block 2 for the following course and distance;

- 11) **North 25°05'28" East a distance of 421.42 feet** to a capped pin set in a shrub bed,

THENCE binding on part of Lot 21 and all of Lot 20, Lot 19, Lot 18, Lot 17 and part of Lot 16 Block 2 for the following course and distance;

- 12) **North 33°36'56" East** passing over a ½" diameter iron pipe found at a distance of 267.22 feet **for a total distance of 417.12 feet** to a capped pin set,

THENCE leaving Bay View Estates binding on Lot 4, Lot 3, Lot 2 and Lot 1 as depicted on a Plot entitled "Lands of Jeffrey W. Mumford & Paula C. Mumford, Minor Subdivision", dated December 11, 2001 and filed for record at the Office of Recorder of Deeds in Plot Book 73, Page 329 for the following course and distance,

- 13) **South 17°46'02" East** passing over a capped pin found with identification stamped "Simpler" at a distance of 121.84 feet **for a total distance of 774.28 feet** to a 1" diameter iron pipe found at the division line between Lot 1 and the previously mentioned lands now or formerly of Carol A. Camelio (see Deed Book 1332, Page 199),

THENCE binding on the lands of Camelio for the following three courses and distances;

- 14) **South 66°26'30" East a distance of 117.99 feet** to a capped pin found with identification stamped "Simpler",

- 15) **North 56°25'51" East a distance of 40.51 feet** to a ½" diameter iron pipe found,

- 16) **South 70°24'51" East** passing over a capped pin set at a distance of 114.39 feet **for a total distance of 122.10 feet** to the point of beginning.

CONTAINING 20.916 acres of land, more or less as surveyed by Cypress Surveys, LLC on June 9, 2020.

BEING all that tract of land intended to be conveyed by Deed from Jeffrey W. Mumford, Trustee of the Jeffrey W. Mumford and Paula C. Mumford Revocable Trust dated June 16, 2014 and Paula C. Mumford, Trustee of the Jeffrey W. Mumford and Paula C. Mumford Revocable Trust dated June 16, 2014 to Keith Coffin and Shelley Jenkins Coffin, dated March 29, 2019 and filed for record at the Office of Recorder of Deeds for Sussex County, Delaware in Deed Book 5036, Page 49.

BEING MORE PARTICULARLY DESCRIBED as being all that tract of land designated as "Lands of Keith Coffin & Shelley Jenkins Coffin" shown on a Plot entitled "Boundary Survey Plan, Lands of Keith Coffin & Shelley Jenkins Coffin", dated June 9, 2020, revised October 6, 2020 and prepared by Cypress Surveys, LLC

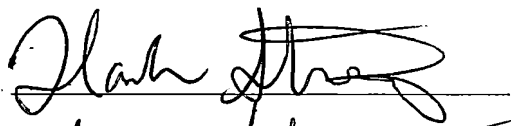

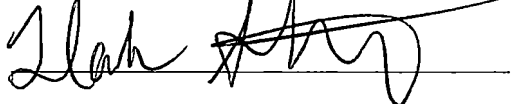

THIS CONVEYANCE IS FURTHER SUBJECT TO any and all restrictions, reservations, conditions, easements and agreements of record in the Office of the Recorder of Deeds in and for Sussex County, at Georgetown, Delaware.

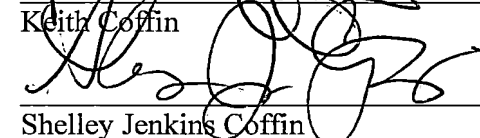

THIS CORRECTIVE DEED IS BEING RECORDED TO CORRECT THE LEGAL DESCRIPTION AS DESCRIBED IN THE ORIGINAL DEED RECORDED ON JULY 1, 2020, IN DEED BOOK 5264, Page 217.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

IN WITNESS WHEREOF, the said parties of the first part have hereunto set their Hands and Seals the 2nd day of ~~October~~ ^{November}, 2020.

WITNESS:

Keith Coffin (SEAL)

Shelley Jenkins Coffin (SEAL)

STATE OF DELAWARE :
: SS.
COUNTY OF SUSSEX :

BE IT REMEMBERED, that on this 2nd day of ~~October~~ ^{November}, 2020, personally came before me, the Subscriber, a Notary Public for the State and County aforesaid, Keith Coffin and Shelley Jenkins Coffin, parties to this Deed, known to me personally to be such, and acknowledged this Deed to be their act and deed.

GIVEN under my Hand and Seal of Office the day and year aforesaid.

Notary Public

[Notary Seal]

My commission expires:

2/24/24
Lisa Kay Gordy Notary Public
Wicomico County Maryland
My Commission Exp 2/24/24.

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was State Plane Delaware zone (FIPSZONE 0700). The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or State Plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of information shown on this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at <http://www.ngs.noaa.gov> or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, NNGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3282
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242, or visit its website at <http://www.ngs.noaa.gov>.

Base map information shown on this FIRM was provided in digital format by Delaware Geospatial Data Exchange. The base map features were compiled at a scale of 1:24,000 from aerial photography dated 2011.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Information eXchange** at 1-877-336-2627 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Information eXchange may also be reached by Fax at 1-800-358-9620 and their website at <http://www.msc.fema.gov/>.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA MAP (1-877-336-2627) or visit the FEMA website at <http://www.fema.gov/business/nfip>.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

- ZONE A** No Base Flood Elevations determined.
- ZONE AE** Base Flood Elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
- ZONE AO** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
- ZONE AR** Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
- ZONE A99** Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
- ZONE V** Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
- ZONE VE** Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS
ZONE X Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS
ZONE X Areas determined to be outside the 0.2% annual chance floodplain.
ZONE D Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- Floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Area zones and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- Limit of Moderate Wave Action
- Advisory line estimating flooding extents if dunes are breached during a 0.2% annual chance flood event
- Base Flood Elevation line and value; elevation in feet*
- Base Flood Elevation value where uniform within zone; elevation in feet*

- * Referenced to the North American Vertical Datum of 1988
- △ Cross section line
- Transsect line
- 87°07'45", 32°22'30" Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- 76°00'00"N 1000-meter Universal Transverse Mercator grid values, zone 18N
- 600000 FT 5000-foot grid values; Delaware State Plane coordinate system (FIPSZONE 0700), Transverse Mercator projection
- DX5510 x Bench mark (see explanation in Notes to Users section of this FIRM panel)
- M1.5 River Mile
- MAP REPOSITORY Refer to listing of Map Repositories on Map Index
- EFFECTIVE DATE OF COUNTYWIDE FLOOD INSURANCE RATE MAP June 16, 1995
- EFFECTIVE DATE(S) OF REVISION(S) TO THIS PANEL See Notice to Users Page in FIS Report

For community map revision history prior to countywide mapping, refer to the Community Map History table located in the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in this community, contact your Insurance agent or call the National Flood Insurance Program at 1-800-638-6620.

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was State Plane Delaware zone (FIPSZONE 0700). The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or State Plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of information shown on this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at <http://www.ngs.noaa.gov> or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, NNGS12
National Geodetic Survey
SSM-C-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3282
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242, or visit its website at <http://www.ngs.noaa.gov>.

Base map information shown on this FIRM was provided in digital format by Delaware Geospatial Data Exchange. The base map features were compiled at a scale of 1:24,000 from aerial photography dated 2011.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to confirm to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

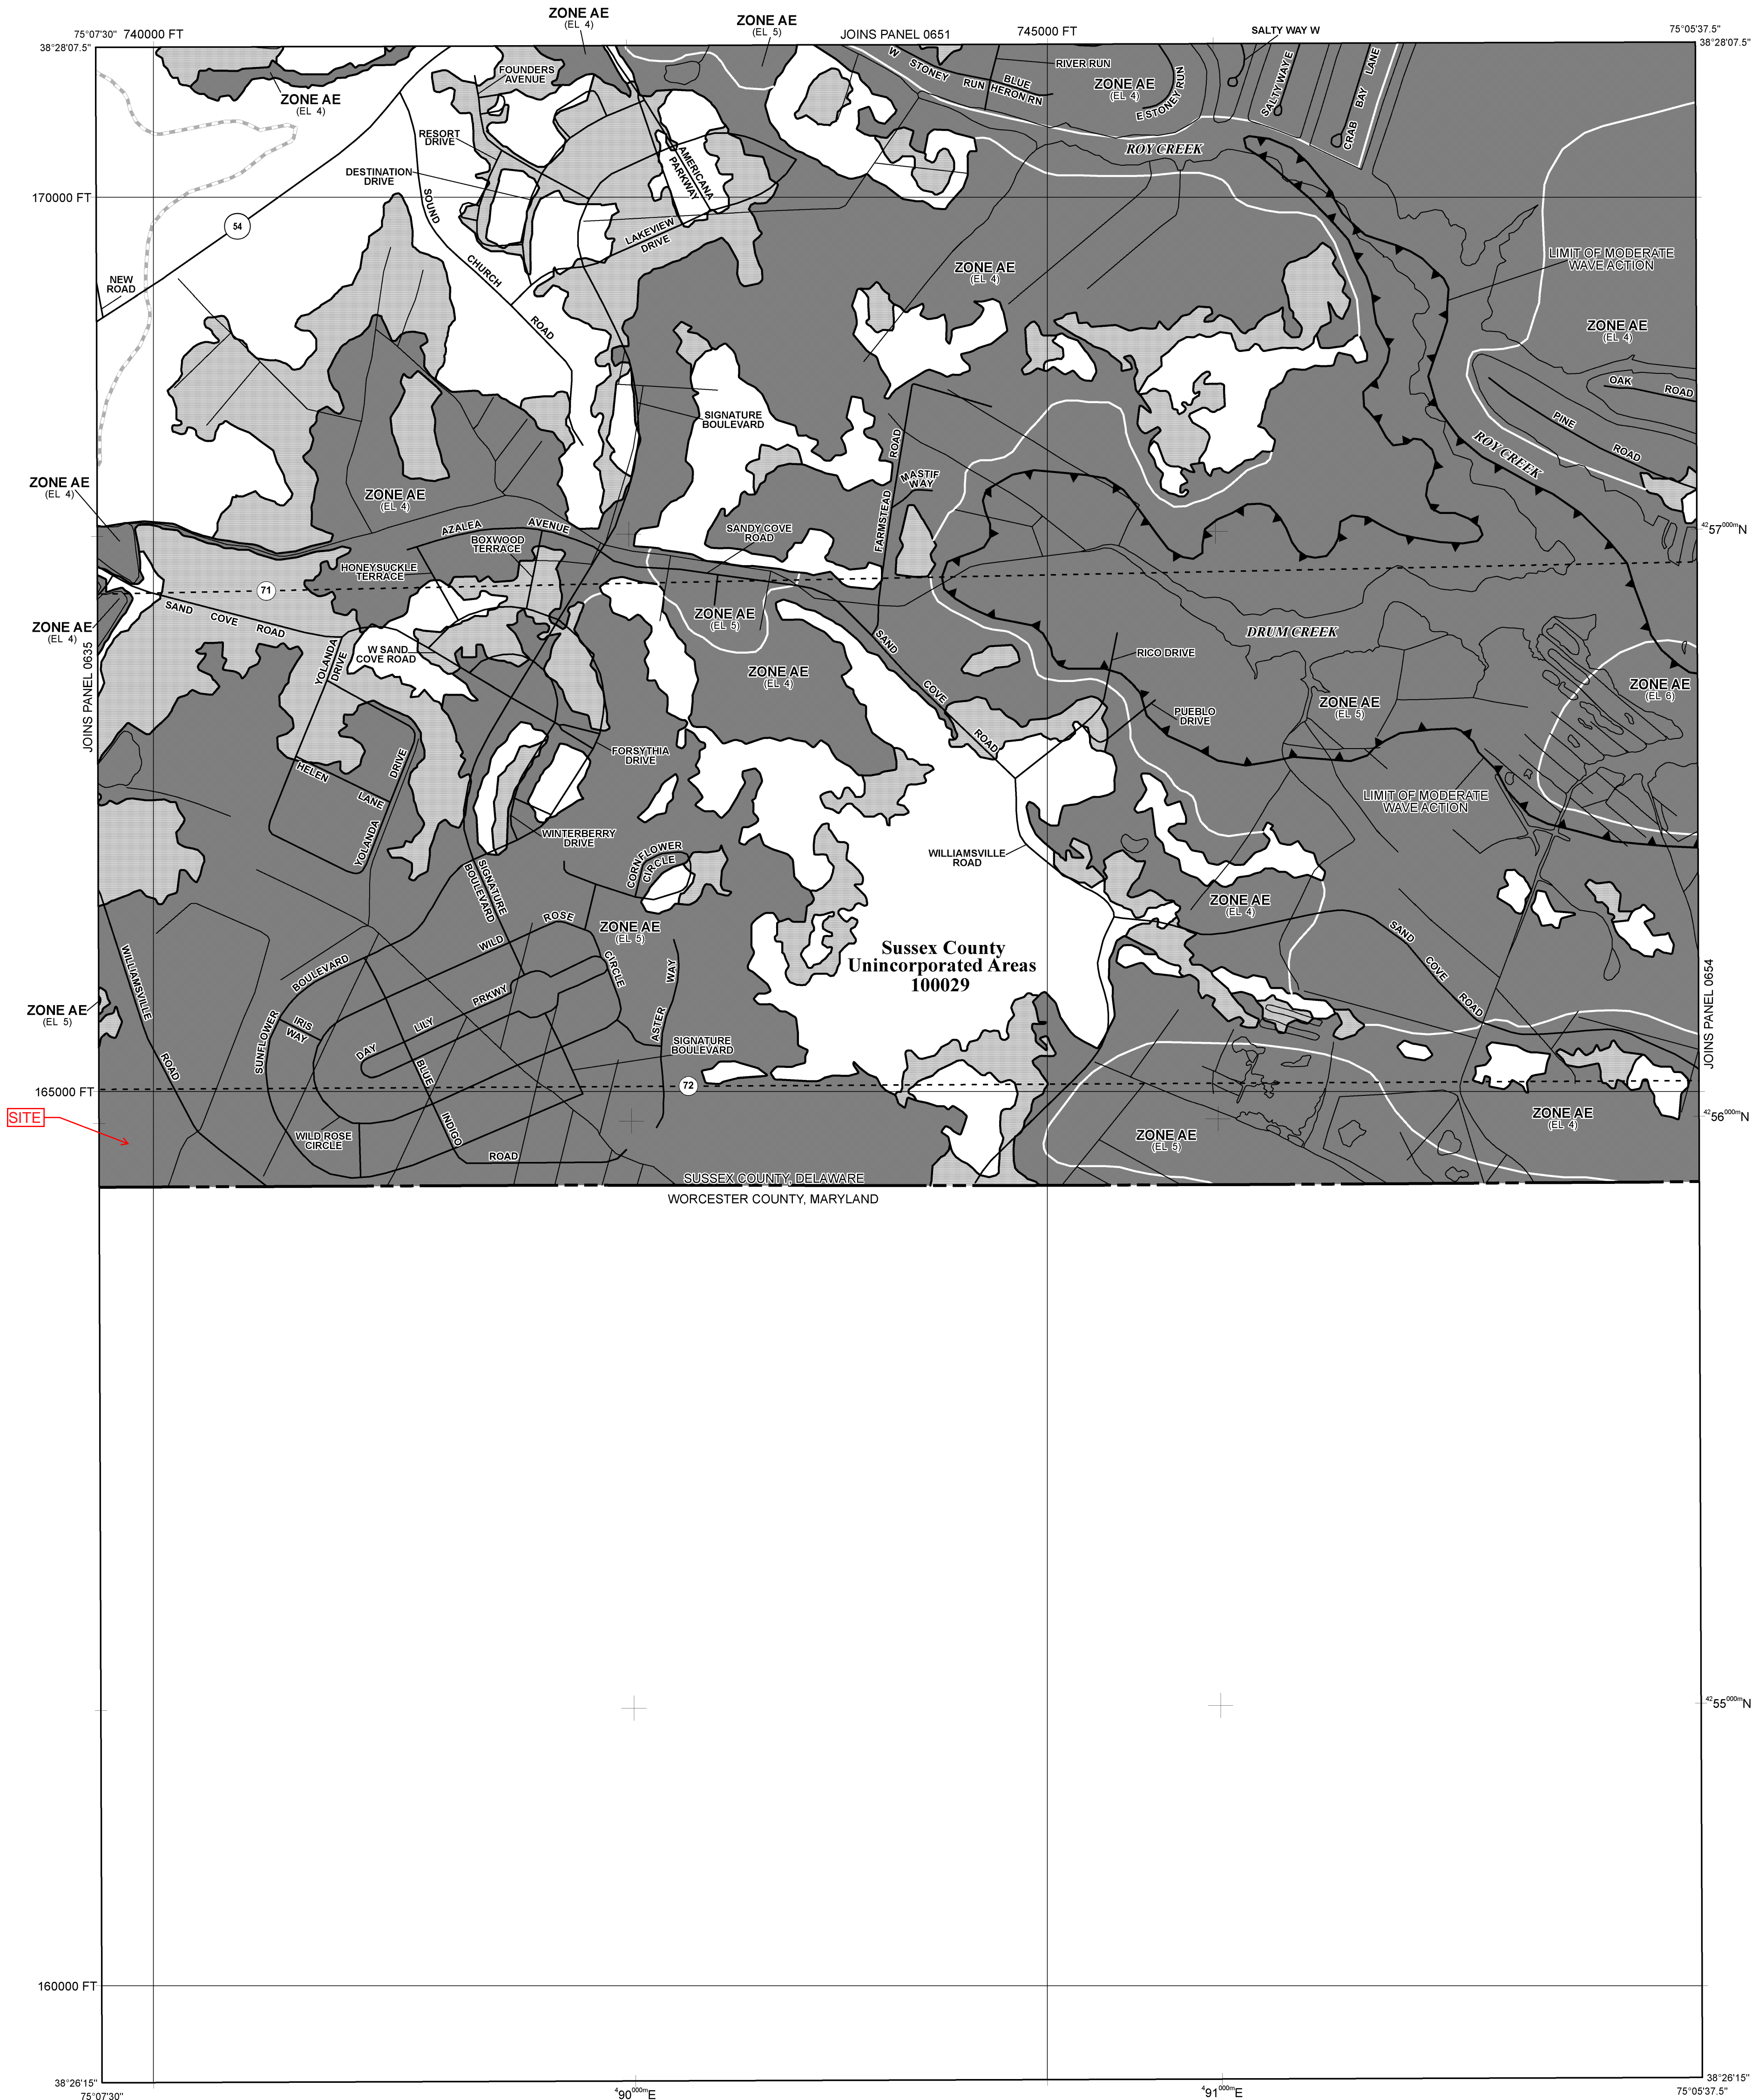

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

The AE Zone category has been divided by a **Limit of Moderate Wave Action (LIMWA)**. The LIMWA represents the approximate landward limit of the 1.5-foot breaking wave. The effects of wave hazards between the VE Zone and the LIMWA (or between the shoreline and the LIMWA for areas where VE Zones are not identified) will be similar to, but less severe than those in the VE Zone.

Contact the **FEMA Map Information eXchange** at 1-877-336-2627 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Information eXchange may also be reached by Fax at 1-800-358-9520 and their website at <http://www.msc.fema.gov/>.

LEGEND

SPECIAL FLOOD HAZARD AREAS (SFHAs) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

- ZONE A** No Base Flood Elevations determined.
- ZONE AE** Base Flood Elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
- ZONE AO** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
- ZONE AR** Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
- ZONE A99** Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
- ZONE V** Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
- ZONE VE** Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

- OTHER FLOOD AREAS**
 - ZONE X** Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

- ZONE X** Areas determined to be outside the 0.2% annual chance floodplain.
- ZONE D** Areas in which flood hazards are undetermined, but possible.
- COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS**
- OTHERWISE PROTECTED AREAS (OPAs)**

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- Floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Areas and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.

A detailed topographic map of Mayapple Farm in Sussex County, Delaware. The map features numerous property lines outlined in pink, with some areas labeled with acreage in green (e.g., 19.00 AC, 6.00 AC, 10.51 AC, 5.71 AC, 20.75 AC, 2.03 AC, 23.70 AC, 4.15 AC, 3.25 AC, 4.32 AC, 7.05 AC). Roads are shown in grey, including W Line Rd, Muskrattown Rd, Captains Ln, Bayview Blvd, Seagull Rd, and others. The terrain is represented by brown contour lines. A large blue area in the upper center represents a body of water. The map is bordered by the Delaware-Maryland state line at the bottom, with labels for 'DELAWARE' and 'MARYLAND'. To the right, it borders 'WORCESTER COUNTY' and 'STATE OF MARYLAND'. A scale bar at the bottom left indicates 0, 150, and 300 feet.

JENNIFER COHAN
SECRETARY

September 29, 2020

Mr. Jamie Whitehouse, Director
Sussex County Planning & Zoning
P.O. Box 417
Georgetown, DE 19947

Dear Mr. Whitehouse:

The Department has completed its review of a Service Level Evaluation Request for the **Mayapple Farm, LLC** conditional use application, which we received on August 31, 2020. This application is for an approximately 23.70-acre parcel (Tax Parcel: 533-19.00-289.05). The subject land is located on the southwest side of Williamsville Road (Sussex Road 395), approximately 4,000 feet south of the intersection of Lighthouse Road (Sussex Road 58) and Williamsville Road. The subject land is currently zoned AR-1 (Agricultural Residential), and the applicant is seeking a conditional use approval to develop 41 single-family detached condominium houses.

Per the 2019 Delaware Vehicle Volume Summary, the annual average and summer average daily traffic volumes along the segment of Williamsville Road where the subject land is located, which is from Lighthouse Road to the Delaware / Maryland state line, are 2,676 and 3,444 vehicles per day, respectively.

Based on our review, we estimate that the above land use will generate fewer than 50 vehicle trips in any hour and fewer than 500 vehicle trips per day. These numbers of trips are DelDOT's minimum warrants for determining that a Traffic Impact Study (TIS) should be required for a particular development. Because the proposed land use would not meet these warrants, we consider the development's traffic impact to be negligible in the context of our agreement with the County regarding land development coordination and we do not recommend that the applicant be required to perform a TIS for the subject application. DelDOT's description of this application as negligible with regard to warranting a TIS does not mean that it is negligible in other respects. We recommend that the applicant not be required to perform a TIS for the subject application.

If the County approves this application, the applicant should be reminded that DelDOT requires compliance with State regulations regarding plan approvals and entrance permits, whether or not a TIS is required.

Mr. Jamie Whitehouse

RE: Ability to Serve Letter for Mayapple Farm Tax Parcel 533-19.00-289.05

Dear Mr. Myrick:

With reference to your request concerning water service to the Mayapple Farm project on Williamsville Road, Sussex County, Delaware, please be advised as follows:

The proposed project consisting of approximately 41 detached single-family condominiums and a pool complex is within Artesian Water Company's service territory. A Certificate of Public Convenience and Necessity (CPCN) for water has been granted to Artesian by the Delaware Public Service Commission for this property. The developer and Artesian Water Company, Inc. shall enter into a Water Service Agreement that addresses the financial terms of the provision of water service in accordance with Artesian's tariff as approved by the Delaware Public Service Commission.

Based on current conditions and projections of growth within the Company's service area, Artesian is willing and able to provide the required water service to this project. An anticipated construction schedule is required in order for Artesian to assess the impact of service requests upon its ability to meet projected water demands.

This letter shall expire if agreements are not executed within one year of the date of this letter.

If you have any questions, please do not hesitate to contact us.

Yours very truly,

A handwritten signature in black ink, appearing to read "Adam Gould".

Application Section I

SUBJECT: CENAP-OP-R 2018-358-23 (Preliminary JD)
Project Name: Little Creek Subdivision SX
Latitude/Longitude: 38.452832° N /-75.125399° W

Edward M. Launay
Environmental Resources, Incorporated
38173 DuPont Boulevard
Post Office Box 169
Selbyville, Delaware 19975

Dear Mr. Launay:

The plan identified on the following page depicts all delineated waterways and wetlands on the subject site that may be jurisdictional under Section 404 of the Clean Water Act and/or Section 10 of the Rivers and Harbor Act.

Pursuant to Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act, a Department of the Army permit is required for work or structures in navigable waters of the United States and the discharge of dredged or fill material into waters of the United States including adjacent wetlands. Any proposal to perform the above activities within any waters of the United States requires the prior approval of this office.

This preliminary determination has been conducted to identify the location(s) of wetlands and waters that may be waters of the United States for the particular site identified in this request. This determination may not be valid for the wetland conservation provisions of the Food Security Act of 1985, as amended. If you or your tenant are U.S. Department of Agriculture (USDA) program participants, or anticipate participating in USDA programs, you should request a certified wetland determination from the local office of the Natural Resources Conservation Service prior to starting work.

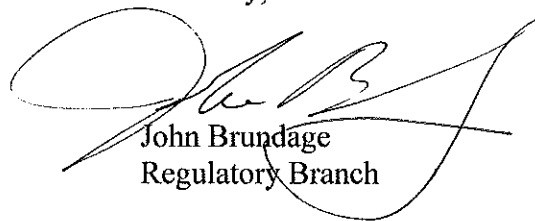

This preliminary jurisdictional determination is non-binding and indicates that there may be waters of the United States, including wetlands on the parcel. Pursuant to Federal Regulations at 33 C.F.R. 331.2, preliminary JDs are advisory in nature and may not be appealed (see attached Notification of Appeal Form - Enclosure 1). However, the applicant retains the right to request an approved jurisdictional determination, which may be appealed. Also enclosed (Enclosure 2) is a copy of the Preliminary Jurisdictional Determination Form signed by the applicant or his agent agreeing to accept a preliminary jurisdictional determination. Please be aware that for purposes of computation of impacts, compensatory mitigation requirements, and

other resource protection measures, a permit decision made on the basis of a preliminary JD will treat all waters and wetlands that would be affected in any way by the permitted activity as if they are jurisdictional waters of the U.S.

This letter is valid for a period of five (5) years. However, this preliminary jurisdictional determination is issued in accordance with current Federal regulations and is based upon the existing site conditions and information provided by you in your application. This office reserves the right to reevaluate and modify the preliminary jurisdictional determination at any time should the existing site conditions or Federal regulations change, or should the information provided by you prove to be false, incomplete or inaccurate.

If you have any questions regarding this matter, please contact me at (302) 736-9763, by email at john.g.brundage@usace.army.mil or by writing to the above address.

Sincerely,

John Brundage
Regulatory Branch

SUBJECT PROPERTY: Little Creek Subdivision, a 20.53 acre property located at Tax Map 533-19.00, Parcel 289.05 in Baltimore Hundred, Selbyville, Sussex County, Delaware.

SURVEY DESCRIPTION: Plan prepared by GMB, LLC, dated December 2016, unrevised, titled: *Wetlands Location, Little Creek Subdivision, Parcel 289.5; Tax Map 5-33-19, Baltimore Hundred, Sussex County, Delaware, Sheet W1.*

Appendix 2 - PRELIMINARY JURISDICTIONAL DETERMINATION (PJD) FORM

BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR PJD: **MAY 29 2018**

B. NAME AND ADDRESS OF PERSON REQUESTING PJD:

Steven Smith, Summer Hill Development C/O: Edward Launay, ERI, 38173 DuPont Boulevard, Selbyville, DE 19975

C. DISTRICT OFFICE, FILE NAME, AND NUMBER:

CENAP-OP-R-2018-358

D. PROJECT LOCATION(S) AND BACKGROUND INFORMATION:

(USE THE TABLE BELOW TO DOCUMENT MULTIPLE AQUATIC RESOURCES AND/OR AQUATIC RESOURCES AT DIFFERENT SITES)

State: DE County/parish/borough: Sussex City: Selbyville (unincorporated)

Center coordinates of site (lat/long in degree decimal format):

Lat.: xx.xxx° Long.: yy.yyy° 38.452832 N, -75.125399 W

Universal Transverse Mercator: 18 S, 489058.34 m E, 4256067.06 m N

Name of nearest waterbody: Greys Creek

E. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):

☒ Office (Desk) Determination. Date: **MAY 29 2018**

☐ Field Determination. Date(s):

TABLE OF AQUATIC RESOURCES IN REVIEW AREA WHICH "MAY BE" SUBJECT TO REGULATORY JURISDICTION.

Site number	Latitude (decimal degrees)	Longitude (decimal degrees)	Estimated amount of aquatic resource in review area (acreage and linear feet, if applicable)	Type of aquatic resource (i.e., wetland vs. non-wetland waters)	Geographic authority to which the aquatic resource "may be" subject (i.e., Section 404 or Section 10/404)
Wetlands	38.451514	-75.126167	5.06 acre	PFO1Bd	Section 404
Waters (2)	38.451284	-75.125243	0.05 acre	Waters - Nontidal man-made drainage channel.	Section 404 & Section 10

- 1) The Corps of Engineers believes that there may be jurisdictional aquatic resources in the review area, and the requestor of this PJD is hereby advised of his or her option to request and obtain an approved JD (AJD) for that review area based on an informed decision after having discussed the various types of JDs and their characteristics and circumstances when they may be appropriate.
- 2) In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring "pre-construction notification" (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an AJD for the activity, the permit applicant is hereby made aware that: (1) the permit applicant has elected to seek a permit authorization based on a PJD, which does not make an official determination of jurisdictional aquatic resources; (2) the applicant has the option to request an AJD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an AJD could possibly result in less compensatory mitigation being required or different special conditions; (3) the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) undertaking any activity in reliance upon the subject permit authorization without requesting an AJD constitutes the applicant's acceptance of the use of the PJD; (6) accepting a permit authorization (e.g., signing a proffered individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a PJD constitutes agreement that all aquatic resources in the review area affected in any way by that activity will be treated as jurisdictional, and waives any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the applicant elects to use either an AJD or a PJD, the JD will be processed as soon as practicable. Further, an AJD, a proffered individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331. If, during an administrative appeal, it becomes appropriate to make an official determination whether geographic jurisdiction exists over aquatic resources in the review area, or to provide an official delineation of jurisdictional aquatic resources in the review area, the Corps will provide an AJD to accomplish that result, as soon as is practicable. This PJD finds that there "may be" waters of the U.S. and/or that there "may be" navigable waters of the U.S. on the subject review area, and identifies all aquatic features in the review area that could be affected by the proposed activity, based on the following information:

SUPPORTING DATA. Data reviewed for PJD (check all that apply)

Checked items should be included in subject file. Appropriately reference sources below where indicated for all checked items:

¹ Districts may establish timeframes for requestor to return signed PJD forms. If the requestor does not respond within the established time frame, the district may presume concurrence and no additional follow up is necessary prior to finalizing an action.

NOTIFICATION OF ADMINISTRATIVE APPEAL OPTIONS AND PROCESS AND REQUEST FOR APPEAL

Applicant: Summer Hill Development Inc.		File Number: 2018-358	Date: 29 May 2018
Attached is:		See Section below	
	INITIAL PROFFERED PERMIT (Standard Permit or Letter of permission)	A	
	PROFFERED PERMIT (Standard Permit or Letter of permission)	B	
	PERMIT DENIAL	C	
	APPROVED JURISDICTIONAL DETERMINATION	D	
X	PRELIMINARY JURISDICTIONAL DETERMINATION	E	

SECTION I - The following identifies your rights and options regarding an administrative appeal of the above decision. Additional information may be found at

<http://www.usace.army.mil/Missions/CivilWorks/RegulatoryProgramandPermits/appeals.aspx> or Corps regulations at 33 CFR Part 331.

A: INITIAL PROFFERED PERMIT: You may accept or object to the permit.

- **ACCEPT:** If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- **OBJECT:** If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district engineer. Your objections must be received by the district engineer within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district engineer will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district engineer will send you a proffered permit for your reconsideration, as indicated in Section B below.

B: PROFFERED PERMIT: You may accept or appeal the permit

- **ACCEPT:** If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- **APPEAL:** If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

C: PERMIT DENIAL: You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

D: APPROVED JURISDICTIONAL DETERMINATION: You may accept or appeal the approved JD or provide new information.

- **ACCEPT:** You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of this notice, means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.
- **APPEAL:** If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

E: PRELIMINARY JURISDICTIONAL DETERMINATION: You do not need to respond to the Corps regarding the preliminary JD. The Preliminary JD is not appealable. If you wish, you may request an approved JD (which may be appealed), by contacting the Corps district for further instruction. Also you may provide new information for further consideration by the Corps to reevaluate the JD.

SECTION II - REQUEST FOR APPEAL or OBJECTIONS TO AN INITIAL PROFFERED PERMIT

REASONS FOR APPEAL OR OBJECTIONS: (Describe your reasons for appealing the decision or your objections to an initial proffered permit in clear concise statements. You may attach additional information to this form to clarify where your reasons or objections are addressed in the administrative record.)

ADDITIONAL INFORMATION: The appeal is limited to a review of the administrative record, the Corps memorandum for the record of the appeal conference or meeting, and any supplemental information that the review officer has determined is needed to clarify the administrative record. Neither the appellant nor the Corps may add new information or analyses to the record. However, you may provide additional information to clarify the location of information that is already in the administrative record.

POINT OF CONTACT FOR QUESTIONS OR INFORMATION:

If you have questions regarding this decision and/or the appeal process you may contact:

Mr. Michael D. Yost
U.S. Army Corps of Engineers, Philadelphia District
ATTN: CENAP-OP-R
Wanamaker Building, 100 Penn Square East
Philadelphia, PA 19107-3390
Telephone: (302) 736-9763
Email: michael.d.yost@usace.army.mil

If you only have questions regarding the appeal process you may also contact:

Mr. James W. Haggerty
Regulatory Program Manager (CENAD-PD-OR)
U.S. Army Corps of Engineers
Fort Hamilton Military Community
301 General Lee Avenue
Brooklyn, New York 11252-6700
Telephone number: 347-370-4650

RIGHT OF ENTRY: Your signature below grants the right of entry to Corps of Engineers personnel, and any government consultants, to conduct investigations of the project site during the course of the appeal process. You will be provided a 15 day notice of any site investigation, and will have the opportunity to participate in all site investigations.

Date:

Telephone number:

Signature of appellant or agent.

THREATENED & ENDANGERED SPECIES

June 4, 2021

ERI Project No. 941#1044

Mr. Lawton Myrick
Mayapple Farm, LLC.
5973 Smithys Lane
Salisbury, Maryland 21801

RE: Presence / Absence of Federal / State
Endangered, Threatened & Rare Species Review
Mayapple Farm – Proposed Residential Community
Tax Map Parcel 533-19.00-289.05 (23.7 acres)
Baltimore Hundred, Sussex County, Delaware

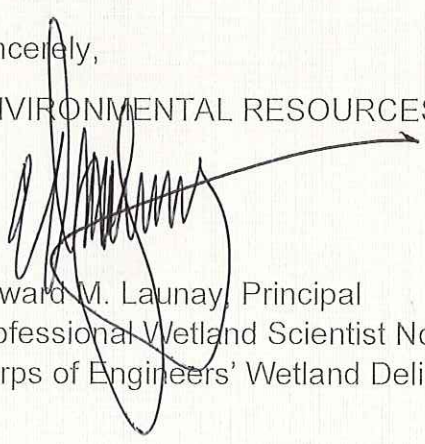

Dear Mr. Myrick,

Environmental Resources, Inc. (ERI) is writing you regarding the 23.7 acre Mayapple Farm property which is being proposed for residential development. I have completed a consultation with the U.S. Fish & Wildlife Services (USFWS) with respect to the presence or absence of any federally listed threatened or endangered species or their critical habitats subject to the Endangered Species Act of 1970. The enclosed USFWS letter concludes that none are present on the property. In regard to any state species of concern, none were listed in the September 29, 2020 Delaware Office of State Planning PLUS Comment letter where the DNREC Division of Fish & Wildlife provides comments.

Based upon my extensive review of the Mayapple Farms, LLC. property, I observed no federal or state threatened or endangered species or their critical habitats present. Should you have any questions, I am available at your convenience.

Sincerely,

ENVIRONMENTAL RESOURCES, INC.

Edward M. Launay, Principal
Professional Wetland Scientist No. 875, Society of Wetland Scientists

Event Code: 05E2CB00-2021-E-03608

Project Name: Mayapple Residential Subdivision

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. This species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at:

<http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>;

<http://www.towerkill.com>; and

[http://](http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html)

www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Event Code: 05E2CB00-2021-E-03608

Project Name: Mayapple Residential Subdivision

Project Type: DEVELOPMENT

Project Description: Proposed location of a future residential community on uplands

Project Location:

Approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@38.45319375,-75.12577492640537,14z>

Counties: Delaware and Maryland

Endangered Species Act Species

There is a total of 0 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Critical habitats

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

USFWS National Wildlife Refuge Lands And Fish Hatcheries

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

Wetlands

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

Acres: 10.09 What is the intended use of the open space (for example, active recreation, passive recreation, stormwater management, wildlife habitat, historical or archeological protection)? Passive recreation, stormwater managment, wildlife habitat, active recreation	
24. Are you considering dedicating any land for community use (e.g., police, fire, school)? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

25. Please estimate How many vehicle trips will this project generate on an average weekday? A trip is a vehicle entering or exiting. If traffic is seasonal, assume peak season: **489**

What percentage of those trips will be trucks, excluding vans and pick-up trucks? **Less than 5%.**

26. Will the project connect to state maintained roads? ☒ Yes ☐ No **Williamsville Road, CR 359**

27. Please list any locations where this project physically could be connected to existing or future development on adjacent lands and indicate your willingness to discuss making these connections. **Sidewalk provided at Community entrance.**

28. Are there existing sidewalks? ☐ Yes ☒ No; bike paths ☐ Yes ☒ No
Are there proposed sidewalks? ☒ Yes ☐ No; bike paths ☐ Yes ☒ No

Is there an opportunity to connect to a larger bike, pedestrian, or transit network? ☒ Yes ☐ No

29. To your knowledge, is this site in the vicinity of any known historic/cultural resources or sites? ☐ Yes ☒ No

Has this site been evaluated for historic and/or cultural resources? ☐ Yes ☒ No

Would you be open to a site evaluation by the State Historic Preservation Office? ☐ Yes ☒ No

30. To promote an accurate review of your parcel's features, would you permit a State agency site visit? ☒ Yes ☐ No
Person to contact to arrange visit: **Lawton Myrick** phone number: **410-742-3115**

31. Are any federal permits, licensing, or funding anticipated? ☐ Yes ☒ No

I hereby certify that the information on this application is complete, true and correct, to the best of my knowledge.

RE: PLUS review 2020-08-09; Mayapple Farm

Dear Mr. Myrick:

Thank you for meeting with State agency planners on August 26, 2020 to discuss the proposed plans for the Mayapple Farm project. According to the information received you are seeking review of a proposed site plan for 41 residential units on 20.67 acres along Williamsville Road in Sussex County.

Please note that changes to the plan, other than those suggested in this letter, could result in additional comments from the State. **The developers will also need to comply with any Federal, State, and local regulations regarding this property. We also note that as Sussex County is the governing authority over this land, the developers will need to comply with any and all regulations/restrictions set forth by the County.**

Strategies for State Policies and Spending

This project is located in Investment Levels 3 and 4 according to the 2020 Strategies for State Policies and Spending. Investment Level 3 reflects areas where growth is anticipated by local, county, and state plans in the longer-term future, or areas that may have environmental or other constraints to development. State investments may support future growth in these areas but may have priorities for the near future. Level 3 areas may also mean that there are environmental concerns on or near the parcel and we would encourage you to design the site with respect for the environmental features which are present. Investment Level 4 indicates where State investments will support agricultural preservation, natural resource protection, and the continuation of the rural nature of these areas. The Office of State Planning does not support the residential development in the Level 4 area and we ask that the homes planned in the Level 4 area be removed from the site plan.

Code Requirements/Agency Permitting Requirements

Department of Transportation – Contact Bill Brockenbrough 760-2109

- The site access on Williamsville Road (Sussex Road 395) must be designed in accordance with DelDOT's Development Coordination Manual, which is available at <http://www.deldot.gov/Business/subdivisions/index.shtml?dc=changes>.
- Pursuant to Section 1.3 of the Manual, a Pre-Submittal Meeting is required before plans are submitted for review. The form needed to request the meeting and guidance on what will be covered there and how to prepare for it is located at https://www.deldot.gov/Business/subdivisions/pdfs/Meeting_Request_Form.pdf?08022017.
- Section 1.6 of the Manual addresses the location of development entrances. The site access must be located in accordance with that section and specifically in accordance with Figure 1.5.1 which is referenced therein.
- Section 1.7 of the Manual addresses fees that are assessed for the review of development proposals. DelDOT anticipates collecting the Initial Stage Fee when the record plan is submitted for review and the Construction Stage Fee when construction plans are submitted for review.
- Per Section 2.2.2.1 of the Manual, Traffic Impact Studies (TIS) are warranted for developments generating more than 500 vehicle trip ends per day or 50 vehicle trip ends per hour in any hour of the day. From the PLUS application, the total daily trips are estimated at 489 vehicle trip ends per day. Using the 10th edition of the Institute of Transportation Engineers' Trip Generation Manual, DelDOT estimates the trip generation of 41 single-family detached houses at 458 vehicle trip ends per day and the weekday morning and evening peak hour trip ends at 34 and 43, respectively. Therefore, a TIS is not warranted.

The purpose of a TIS is to determine what off-site improvements are needed to support a proposed development. DelDOT anticipates requiring the developer to improve Williamsville Road, within the limits of their projected frontage, that is from the south limits of their parcel frontage to the north limits of the David R. Kohout property (Tax Parcel No. 533-19.00-289.09) frontage, to meet DelDOT's Local Road standards, which include 11-foot lanes and 5-foot shoulders.

- As necessary, in accordance with Section 3.2.5 and Figure 3.2.5-a of the Manual, DelDOT will require dedication of right-of-way along the site's frontage on Williamsville Road. By this regulation, this dedication is to provide a minimum of 30 feet of right-of-way from the physical centerline. The following right-of-way dedication note is required, **"An X-foot wide right-of-way is hereby dedicated to the State of Delaware, as per this plat."**

- In accordance with Section 3.2.5.1.2 of the Manual, DelDOT will require the establishment of a 15-foot wide permanent easement across the property frontage. The location of the easement shall be outside the limits of the ultimate right-of-way. The easement area can be used as part of the open space calculation for the site. The following note is required, **“A 15-foot wide permanent easement is hereby established for the State of Delaware, as per this plat.”**
- Referring to Section 3.4.2.1 of the Manual, the following items, among other things, are required on the Record Plan:
 - A Traffic Generation Diagram. See Figure 3.4.2-a for the required format and content.
 - Depiction of all existing entrances within 600 feet of the entrance on Williamsville Road.
 - Notes identifying the type of off-site improvements, agreements (signal, letter) contributions and when the off-site improvements are warranted.
- Section 3.5.4.2 of the Manual addresses requirements for Shared Use Paths (SUP) and sidewalks. For projects in Level 3 and 4 Investment Areas, installation of paths or sidewalks along the frontage on State-maintained roads is at DelDOT’s discretion but given the largely developed nature of the surrounding area, DelDOT anticipates requiring the developer to build an SUP along their frontage on Williamsville Road.
- In accordance with Section 3.8 of the Manual, storm water facilities, excluding filter strips and bioswales, shall be located a minimum of 20 feet from the ultimate State right-of-way along Williamsville Road.
- In accordance with Section 5.2.9 of the Manual, the Auxiliary Lane Worksheet should be used to determine whether auxiliary lanes are warranted at the site entrances and how long those lanes should be. The worksheet can be found at <http://www.deldot.gov/Business/subdivisions/index.shtml>.
- In accordance with Section 5.4 of the Manual, sight distance triangles are required and shall be established in accordance with American Association of State Highway and Transportation Officials (AASHTO) standards. A spreadsheet has been developed to assist with this task. It can be found at <http://www.deldot.gov/Business/subdivisions/index.shtml>.
- In accordance with Section 5.14 of the Manual, all existing utilities must be shown on the plan and a utility relocation plan will be required for any utilities that need to be relocated.

Department of Natural Resources and Environmental Control – Beth Krumrine 735-3480
Special Flood Hazard Area

- The project application appears to be referencing outdated floodplain maps. According to the newest Flood Insurance Rate Maps (FIRM), this parcel is situated within the 100-year floodplain (1% annual chance of flooding), also referred to as a Special Flood Hazard Area. This is the area where the National Flood Insurance Program's floodplain management regulations must be enforced, and the mandatory purchase of flood insurance applies under some circumstances.
- The applicant must comply with local floodplain ordinance and regulations applicable to development or construction within the floodplain. In determining the boundary of the floodplain, use the most recent FIRM maps available, which can be found at <https://maps.dnrec.delaware.gov/floodplanning/default.html>.
- Contact: DNREC Shoreline and Waterway Management Section at (302) 739-9921. Website: <http://www.dnrec.delaware.gov/swc/Drainage/Pages/Flooding.aspx>

Stormwater Management

- Land disturbing activity (soil disturbance) has met the minimum threshold of 5000 square feet triggering Sediment and Stormwater Plan requirements.
- Projects disturbing greater than 5,000 square feet require the development and approval of a Sediment and Stormwater Plan prior to any land disturbing activity taking place on the site. The plan must be approved by the appropriate agency. This agency will vary depending on the location of the project, or whether is operated by a state agency or school district. The appropriate agency for this project is identified below.
- Additionally, construction activities that exceed 1.0 acre of land disturbance require Construction General Permit coverage through submittal of an electronic Notice of Intent for Stormwater Discharges Associated with Construction Activity. This form must be submitted electronically (<https://apps.dnrec.state.de.us/eNOI/default.aspx>) to the DNREC Division of Watershed Stewardship, along with the \$195 fee.
- Schedule a project application meeting with the appropriate agency prior to moving forward with the stormwater and site design. As part of this process, you must submit a Stormwater Assessment Study.
- Appropriate plan review agency contact: Sussex Conservation District at (302) 856-2105. Website: <https://www.sussexconservation.org/>

- General stormwater contact: DNREC Sediment and Stormwater Program at (302) 739-9921.
E-mail: DNREC.Stormwater@delaware.gov.
Website: <http://www.dnrec.delaware.gov/swc/Pages/SedimentStormwater.aspx>.

Water Quality

- This site lies within the Inland Bays Watershed, where pollution control strategies exist for nutrient and sediment.
- If zoning is approved and the site is developed, please consult with the Sussex Conservation District to determine if stricter stormwater management standards may apply for development in this area.
- Contact: Sussex Conservation District at (302) 856-2105. Website: <https://www.sussexconservation.org/>

Hydric Soils Group

- Poorly drained soils (Hydric Soils Group B/D) exist on the southern portion of the parcel and the western portion of the parcel (Hydric Soils Group A/D soils). The northwestern third of the parcel is comprised of B soils (moderately well drained).
- Types C and D soils are not conducive to infiltration stormwater Best Management Practices (BMPs) such as bioretention and infiltration basins, which must meet minimum infiltration requirements. All BMPs that propose to use infiltration or natural recharge shall include a soils investigation.
- Contact: DNREC Sediment and Stormwater Program at (302) 739-9921.
E-mail: DNREC.Stormwater@delaware.gov.
Website: <http://www.dnrec.delaware.gov/swc/Pages/SedimentStormwater.aspx>.

Wetlands

- Tidal wetlands exist along the southern edge of the property boundary. Approximately half of the site consists of forested freshwater wetlands, situated in the center of the parcel. According to the project application, a wetland delineation has been completed, and the USACE has signed off on the delineation. According to the applicant, there will be no disturbance to wetland areas, with a buffer of 50' from tidal wetlands, and a buffer of 25' from non-tidal wetlands.

Open Space

- This project proposes open space of 10.09 acres.

- A nutrient management plan is required for all persons or entities who apply nutrients to lands or areas of open space of 10 acres or more.
- Contact: Delaware Department of Agriculture's Nutrient Management Program at (302) 698-4558. Website: <https://agriculture.delaware.gov/nutrient-management/>

State Historic Preservation Office – Contact Carlton Hall 736-7400

- Prehistoric potential is low to moderate. Most of the land is poorly drained soils and there are no comparable sites nearby. Some water/marsh is within distance but there don't appear to be any relic streams/rivers nearby on Beers.
- Historic potential is low to moderate, it appears that the land was potentially owned by Captain J. Bishop (Bishops Cemetery is just north of the parcel). Buildings appear on the historic topographic maps, but this land is open and agricultural. Any archaeological remains that appear may be 19th century field scatter.
- If any project or development proceeds, the developer should be aware of the Unmarked Human Burials and Human Skeletal Remains Law (Del. C. Title 7, Ch. 54).
- If there is federal involvement, in the form of licenses, permits, or funds, the federal agency, often through its client, is responsible for complying with Section 106 of the National Historic Preservation Act (36 CFR 800) and must consider their project's effects on any known or potential cultural or historic resources. For further information on the Section 106 process please review the Advisory Council on Historic Preservation's website at: www.achp.gov

Delaware State Fire Marshall's Office – Contact Duane Fox 259-7037

At the time of formal submittal, the applicant shall provide; completed application, fee, and three sets of plans depicting the following in accordance with the Delaware State Fire Prevention Regulation:

Fire Protection Water Requirements:

- Where a water distribution system is proposed for single-family dwellings it shall be capable of delivering at least 500 gpm for 1-hour duration, at 20-psi residual pressure. Fire hydrants with 1000 feet spacing on centers are required.
- The infrastructure for fire protection water shall be provided, including the size of water mains.

Accessibility:

- The access road to the subdivision from Williamsville Road must be constructed so fire department apparatus may negotiate it. If a “center island” is placed at an entrance into the subdivision, it shall be arranged in such a manner that it will not adversely affect quick and unimpeded travel of fire apparatus into the subdivision.

Additionally, where trees are to be situated adjacent to travel roads in the subdivision, some forethought should be exercised regarding how future growth of the trees may affect fire department travel throughout the subdivision.

- Fire department access shall be provided in such a manner so that fire apparatus will be able to locate within 100 ft. of the front door.
- Any dead-end road more than 300 feet in length shall be provided with a turn-around or cul-de-sac arranged such that fire apparatus will be able to turn around by making not more than one backing maneuver. The dimensions of the cul-de-sac or turn-around shall be shown on the final plans. Also, please note that parking is prohibited in the cul-de-sac or turn around.
- The use of speed bumps or other methods of traffic speed reduction must be in accordance with Department of Transportation requirements.
- The local Fire Chief, prior to any submission to our Agency, shall approve in writing the use of gates that limit fire department access into and out of the development or property.

Required Notes:

- Provide a note on the final plans submitted for review to read “All fire lanes, fire hydrants, and fire department connections shall be marked in accordance with the Delaware State Fire Prevention Regulations”
- Name of Water Supplier
- Proposed Use
- National Fire Protection Association (NFPA) Construction Type
- Maximum Height of Buildings (including number of stories)
- Provide Road Names, even for County Roads

Recommendations/Additional Information

This section includes a list of site-specific suggestions that are intended to enhance the project. These suggestions have been generated by the State Agencies based on their expertise and subject area knowledge. **These suggestions do not represent State code requirements.** They are offered here in order to provide proactive ideas to help the applicant enhance the site design,

and it is hoped (**but in no way required**) that the applicant will open a dialogue with the relevant agencies to discuss how the suggestions can benefit the project.

Department of Transportation – Contact Bill Brockenbrough 760-2109

- The applicant should expect a requirement that any substation and/or wastewater facilities will be required to have access from an internal driveway with no direct access to Williamsville Road.
- The applicant should expect a requirement that all PLUS and Technical Advisory Committee (TAC) comments be addressed prior to submitting plans for review.
- Please be advised that the Standard General Notes have been updated and posted to the DelDOT website. Please begin using the new versions and look for the revision dates of March 21, 2019 and March 25, 2019. The notes can be found at <https://www.deldot.gov/Business/subdivisions/>.

Department of Natural Resources and Environmental Control – Beth Krumrine 735-3480
Concerns Identified Within the Development Footprint

Sea Level Rise

- The majority of this site is vulnerable to permanent inundation as a result of sea level rise. By 2050, sea levels are projected to rise by 0.7 – 1.9 feet; by end of century sea levels are projected to increase by 1.7 – 5.0 feet. In addition to permanent inundation of land, higher tide levels caused by sea level rise will result in increasing frequency and severity of flood events.
- In areas of future sea level rise, avoid construction of permanent structures and infrastructure, particularly those below 3 feet mean higher high water. All infrastructure and structures on site should incorporate the effects of sea level rise through the expected lifespan of the structures. This may include increasing freeboard of structures, ensuring that critical infrastructure is elevated to withstand future sea level rise, construction of flood control measures, and incorporating green infrastructure for flood control.
- Contact: DNREC Climate and Sustainability Section at (302) 735-3480.
Website: <https://dnrec.alpha.delaware.gov/climate-coastal-energy/climate-change/flood-risk-avoidance/>

Special Flood Hazard Area

- Design proposed structures outside of the Special Flood Hazard Area. If this is not possible, the developer should consider designing structures to a higher standard to avoid potential future flood damage and loss.

Stormwater Management

- Integrate runoff reduction techniques including infiltration basins, bioretention (rain gardens), filter strips, and pavers to encourage on-site stormwater infiltration and reduce overall runoff including pollutant runoff.
- For improved stormwater management on any site, preserve existing trees, wetlands, and passive open space. Trees and shrubs native to Delaware should be used to the maximum extent practicable in the landscaping for open spaces.

Wetlands

- To protect the function and integrity of wetlands, incorporate a 100-foot vegetated buffer from the edge of any wetland (both tidal and non-tidal), where feasible. Buffers are an integral component of aquatic and wetland habitats. Buffers reduce sediment and pollutants that may enter a waterway, which can negatively impact aquatic organisms and habitat.

Forest Removal

- Forested lands exist on the site.
- Removing forested areas for development should be avoided to the greatest extent possible. These areas provide habitat for wildlife, uptake nutrients, infiltrate stormwater, and improve water quality. Forests also provide shading and cooling, while reduce carbon that contributes to climate change.
- A forest assessment should be conducted to determine if mature forest resources exist on the property and to delineate their boundaries. If mature forests are found, DNREC recommends that these areas be conserved to the fullest extent possible.

Nuisance Waterfowl

- Wet ponds created for stormwater management purposes may attract resident Canada geese and mute swans that will create a nuisance for community residents. High concentrations of waterfowl in ponds create water-quality problems, leave droppings on

lawn and paved areas and can become aggressive during the nesting season. Short manicured lawns surrounding ponds provide attractive habitat for these species.

- To deter waterfowl from taking up residence in these ponds, DNREC recommends planting the surrounding open space with a mix of native wildflower plantings (to be planted in accordance with the Sediment and Stormwater Plan approval agency requirements). It is best to mow the open space area surrounding the pond only once a year, either in February or March. If mowing must occur more often, it would be helpful to leave a minimum buffer of 15 to 30 feet in width to be mowed, annually. This area would be necessary to adequately deter the waterfowl from inhabiting the area. In addition to deterring nuisance waterfowl, the native wildflower mix will also serve to attract bees, butterflies, and other pollinators, and reduce run-off, which can contain oil and other pollutants that homeowners may use on their lawns and driveways.

Street Curbs

- Small animals, such as turtles and salamanders, have difficulty climbing vertical curbs. Designing the development to exclude curbs is best for these species; however, if road curbing is part of the design, curbing that allows small animals to climb out of the roadbed (such as Cape Cod curbing) is preferred over steep, vertical curbing.

Additional Sustainable Practices

Air Pollution and Greenhouse Gas Reduction

- Use efficient Energy Star rated products and materials in construction and redevelopment to lessen the power source emissions of the project and costs. Every percentage of energy efficiency translates into a percent reduction in pollution. Renewable energy infrastructure such as solar or geothermal will further reduce pollution created from offsite generation. Energy efficiency upgrades for your project may be eligible for funding through the Division of Climate, Coastal, & Energy. Website: www.de.gov/greenenergy, www.de.gov/eeif.
- Install electric vehicle charging infrastructure to assist Delaware in achieving its clean transportation goals. The Division of Climate, Coastal, & Energy offers incentives for clean transportation (electric vehicle charging). These programs address climate change goals of reducing greenhouse gas emissions and improving overall air quality Website: www.de.gov/cleantransportation.
- Air pollution is also directly related to increased motorized transportation activity. Incorporating nonmotorized connectivity and installing bicycle racks where feasible will help to facilitate non-vehicular travel modes.
- Air pollution from new construction is generated through the use of maintenance equipment, paints, and consumer products like roof coatings and primers. Use of structural paint coatings that are low in Volatile Organic Compounds will help protect air quality.

Solid Waste Reduction

- The applicant should consider the use of recycled materials, such as reclaimed asphalt pavement, to reduce landfill waste, heat island effects on paved surfaces, and pavement costs.
- Include space for recycling dumpsters within the preliminary site design stage. These can be placed adjacent to trash dumpsters.

Delaware State Fire Marshall's Office – Contact Duane Fox 259-7037

- Although not a requirement of the State Fire Prevention Regulations, the Office of the State Fire Marshal encourages home builders to consider the benefits of home sprinkler protection in dwellings. The Office of the State Fire Marshal also reminds home builders that they are obligated to comply with requirements of Subchapter III of Chapter 36 of Title 6 of the Delaware Code which can be found at the following website:
<http://delcode.delaware.gov/title6/c036/sc03/index.shtml>
- Preliminary meetings with fire protection specialists are encouraged prior to formal submittal. Please call for appointment. Applications and brochures can be downloaded from our website: www.statefiremarshal.delaware.gov, technical services link, plan review, applications or brochures.

Sussex County Housing – Contact: Brandy Nauman 855-7779

- Sussex County endeavors to promote non-discrimination and affordable housing whenever possible throughout the County. In this regard, the developer and associated financial institutions are encouraged to provide and finance affordable housing opportunities to Sussex County residents in all new developments, and affirmatively market those affordable housing units to diverse populations.
- For questions about opportunities available for affordable housing projects within Sussex County, please consult Sussex County's "Affordable Housing Support Policy". The policy along with other resources are available on the County's Affordable & Fair Housing Resource Center website: www.sussexcountycle.gov/affordable-and-fair-housing-resource-center. The County's Community Development & Housing Department can advise about existing affordable housing opportunities in Sussex County and the appropriate County Department to contact regarding specific development issues concerning future affordable housing projects within Sussex County.
- The Community Development & Housing Department can also explain and assist with any financial support or incentives that may be available to a project from federal, state and county sources, as well as private funding sources that also promote affordable housing in Sussex County.

- Please understand that all residential projects, including Affordable Housing Projects are subject to the applicable provisions of the Sussex County Subdivision and Zoning Codes, and the approval processes set forth in those Codes.

Following receipt of this letter and upon filing of an application with the local jurisdiction, the applicant shall provide to the local jurisdiction and the Office of State Planning Coordination a written response to comments received as a result of the pre-application process, noting whether comments were incorporated into the project design or not and the reason, therefore.

Thank you for the opportunity to review this project. If you have any questions, please contact me at 302-739-3090.

Sincerely,

A handwritten signature in cursive script that reads "Constance C. Holland". The signature is written in dark ink and is positioned above the printed name and title.

Constance C. Holland, AICP
Director, Office of State Planning Coordination
